TIME OUTDOORS

We take a breather, laugh and dream outdoors. With an awning from weinor, your awning becomes the scene of unforgettable moments: when you relax in the cool shade on hot summer days, the evening sun conjures up warm patterns on the ground or atmospheric outdoor nights with gentle lighting awaken holiday feelings. Enjoy the feeling of simply being outdoors – protected, carefree and free.

FOLDING ARM AWNINGS

Folding arm awnings are the classic sun protection solution choice for patios and balconies. They are installed directly on the facade and stretch the awning fabric forwards using two folding arms. The great benefit: The area below remains completely freely available – without posts or supports. This creates flexible shade exactly where you need it: when eating, relaxing or sitting together outdoors. When retracted, the awning disappears compactly on the home wall and preserves the clear lines of your home.

At weinor, folding arm awnings combine this proven functional principle with well thought-out technology and sophisticated design. Depending on the architecture and installation situation, cubic, oval or open versions can be chosen from – always planned to fit perfectly and implemented individually. Innovative technology, such as the weinor LongLife arm, ensures that the fabric remains taut for permanently and that the awning functions reliably – even when large widths are used. High-quality materials and precise German processing make the difference noticeable in daily use. Frame colours, fabric designs and equipment options can be tailored specifically to your living situation. This creates sun protection which does more than merely providing protection, extending your outdoors sensibly: functionally, aesthetically and precisely tailored to you.

CUBIC DESIGN

Awnings with a cubic appearance follow a clear architectural idea: A clear, rectangular shape which self-evidently blends with modern facades. The awning does not compete with the architecture – it becomes part of it.

The straight-lined, closed cassette forms a precise, protective frame for fabric and technology. Everything is neatly integrated, nothing distracts. This creates a striking look, which is particularly attractive in contemporary architecture.

To ensure that this clear shape is always convincing, precise construction and high-quality workmanship are essential. You ensure that function and appearance remain consistent in the long term – even for larger surfaces or exposed installation situations.

Whether with integrated lighting, additional glare protection or colour, matched accurately to the architecture: Folding arm awnings with a cubic appearance can be configured individually and thought through to their logical conclusion. For an outdoors which is yours.

KUBATA

CLEAR DESIGN WITH CONSISTENT LINES

Cubic, reduced, expressive – Kubata underlines the architectural character of modern buildings

KUBATA

Equipment

- ✓ Cassette available with or without a back plate
- ✓ LED spotlights*
- ✓ Flush wall installation*

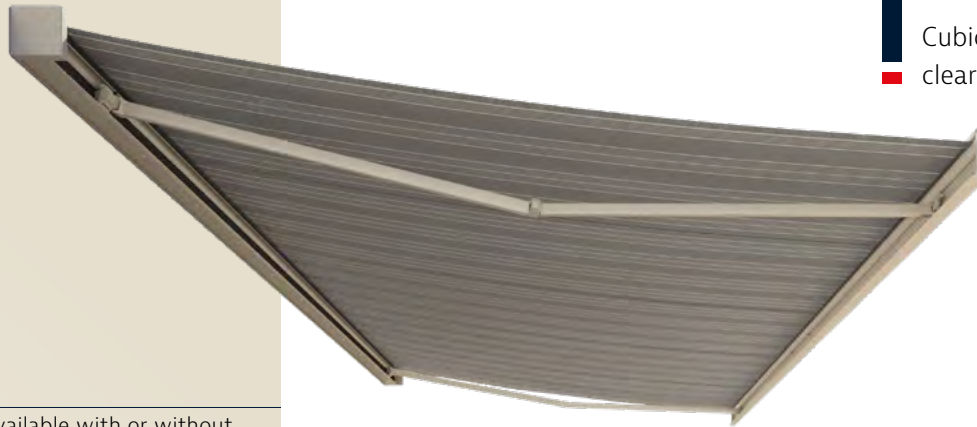

*optional

Profile awning cassette sketch

What is so special?

Cubic, powerful elegance – sets clear accents on the facade.

Kubata was developed for modern architecture, which thinks through clear lines and reduced shapes to their logical conclusion. With its linear, cubic cassette, it appears confidently and emphasizes the stringency of the facade. Its precise design language makes it a visible design element that clearly defines architecture and provides it with an additional contour.

When retracted, the fabric and technology are fully integrated into the closed cassette. The appearance of the building remains clear and tidy, and fabric and technology are protected – even at exposed or weather-intensive installation locations.

It is optionally available with integrated LED lighting for atmospheric light. Thanks to its high wind stability, it also offers reliable protection in changing conditions. The control unit is remote-operated also automated if desired.

Colours, fabric patterns and equipment options can be individually adapted – for a result which is technically convincing and remains consistent in terms of design.

Award-winning with:

SMAILA

COMPACT, CUBIC AWNING

Privacy protection and comfort
for small favourite places

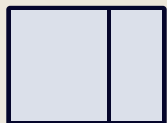

SMAILA

Equipment

- ✓ Compact design with attractive decorative panels
- ✓ VarioShade valance with crank or solar drive*
- ✓ LED spotlights*
- ✓ Flush wall installation*

*optional

Profile awning cassette sketch

Award-winning with:

reddot winner 2024

What is so special?

Five exclusive decorative panels on the cassette sides set individual accents and lend the compact shape a personal touch.

Smaila is a folding arm awning in cubic appearance for situations where limited space is to be used precisely. Developed for balconies and compact patios, its clear shape fits in easily with modern architecture – without claiming space or visually dominating it.

The fully enclosed cassette reliably protects fabric and technology and ensures a neat appearance on the facade. Concealed fixing material supports the reduced design and allows Smaila to become a self-evident part of the building.

Despite its compact design, Smaila offers high comfort in everyday life. Solutions for light and glare protection can be optionally supplemented. The VarioShade valance is a special extra: It offers protection against low sun, prying eyes and dazzling light – even with a solar drive if desired.

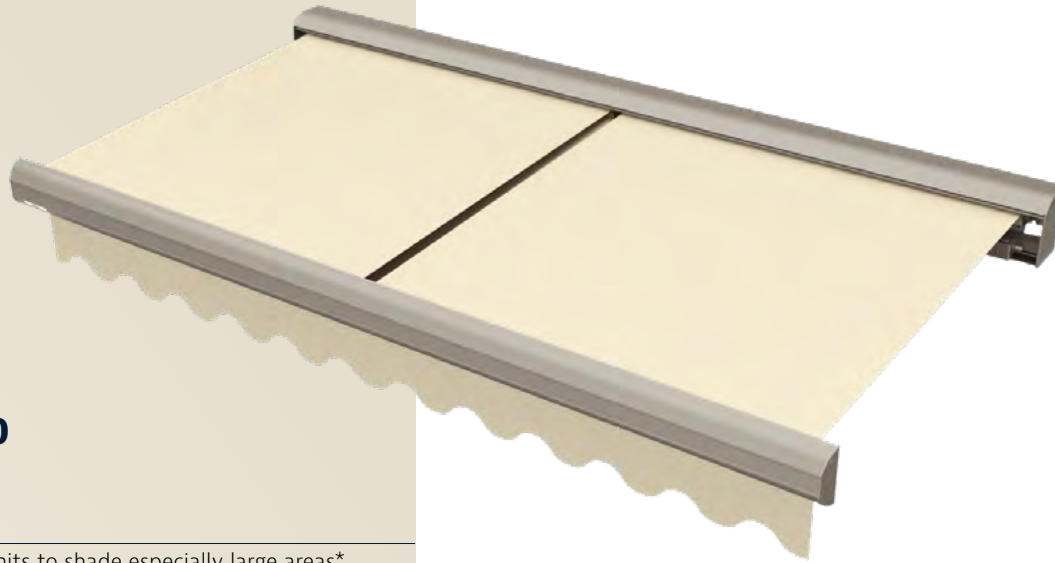

Colours, fabric patterns and design details can be individually adapted to the architecture and usage situation. This creates an awning which is consistently designed even on a small area: functional, clearly designed and matching your outdoors.

I/K/N 2000

CLASSIC SUN PROTECTION, CAN BE INSTALLED VARIABLY

Perfect for all constructional situations,
also for niche installation

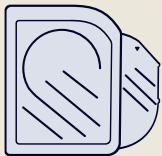

I/K/N 2000

Equipment

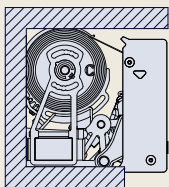

- ✓ Multi-section units to shade especially large areas*
- ✓ Cassette variants without a back plate/
with a back plate/niche
- ✓ LED light bar*

*optional

Flush-mounted installation profile sketch

Niche installation profile sketch

What is so special?

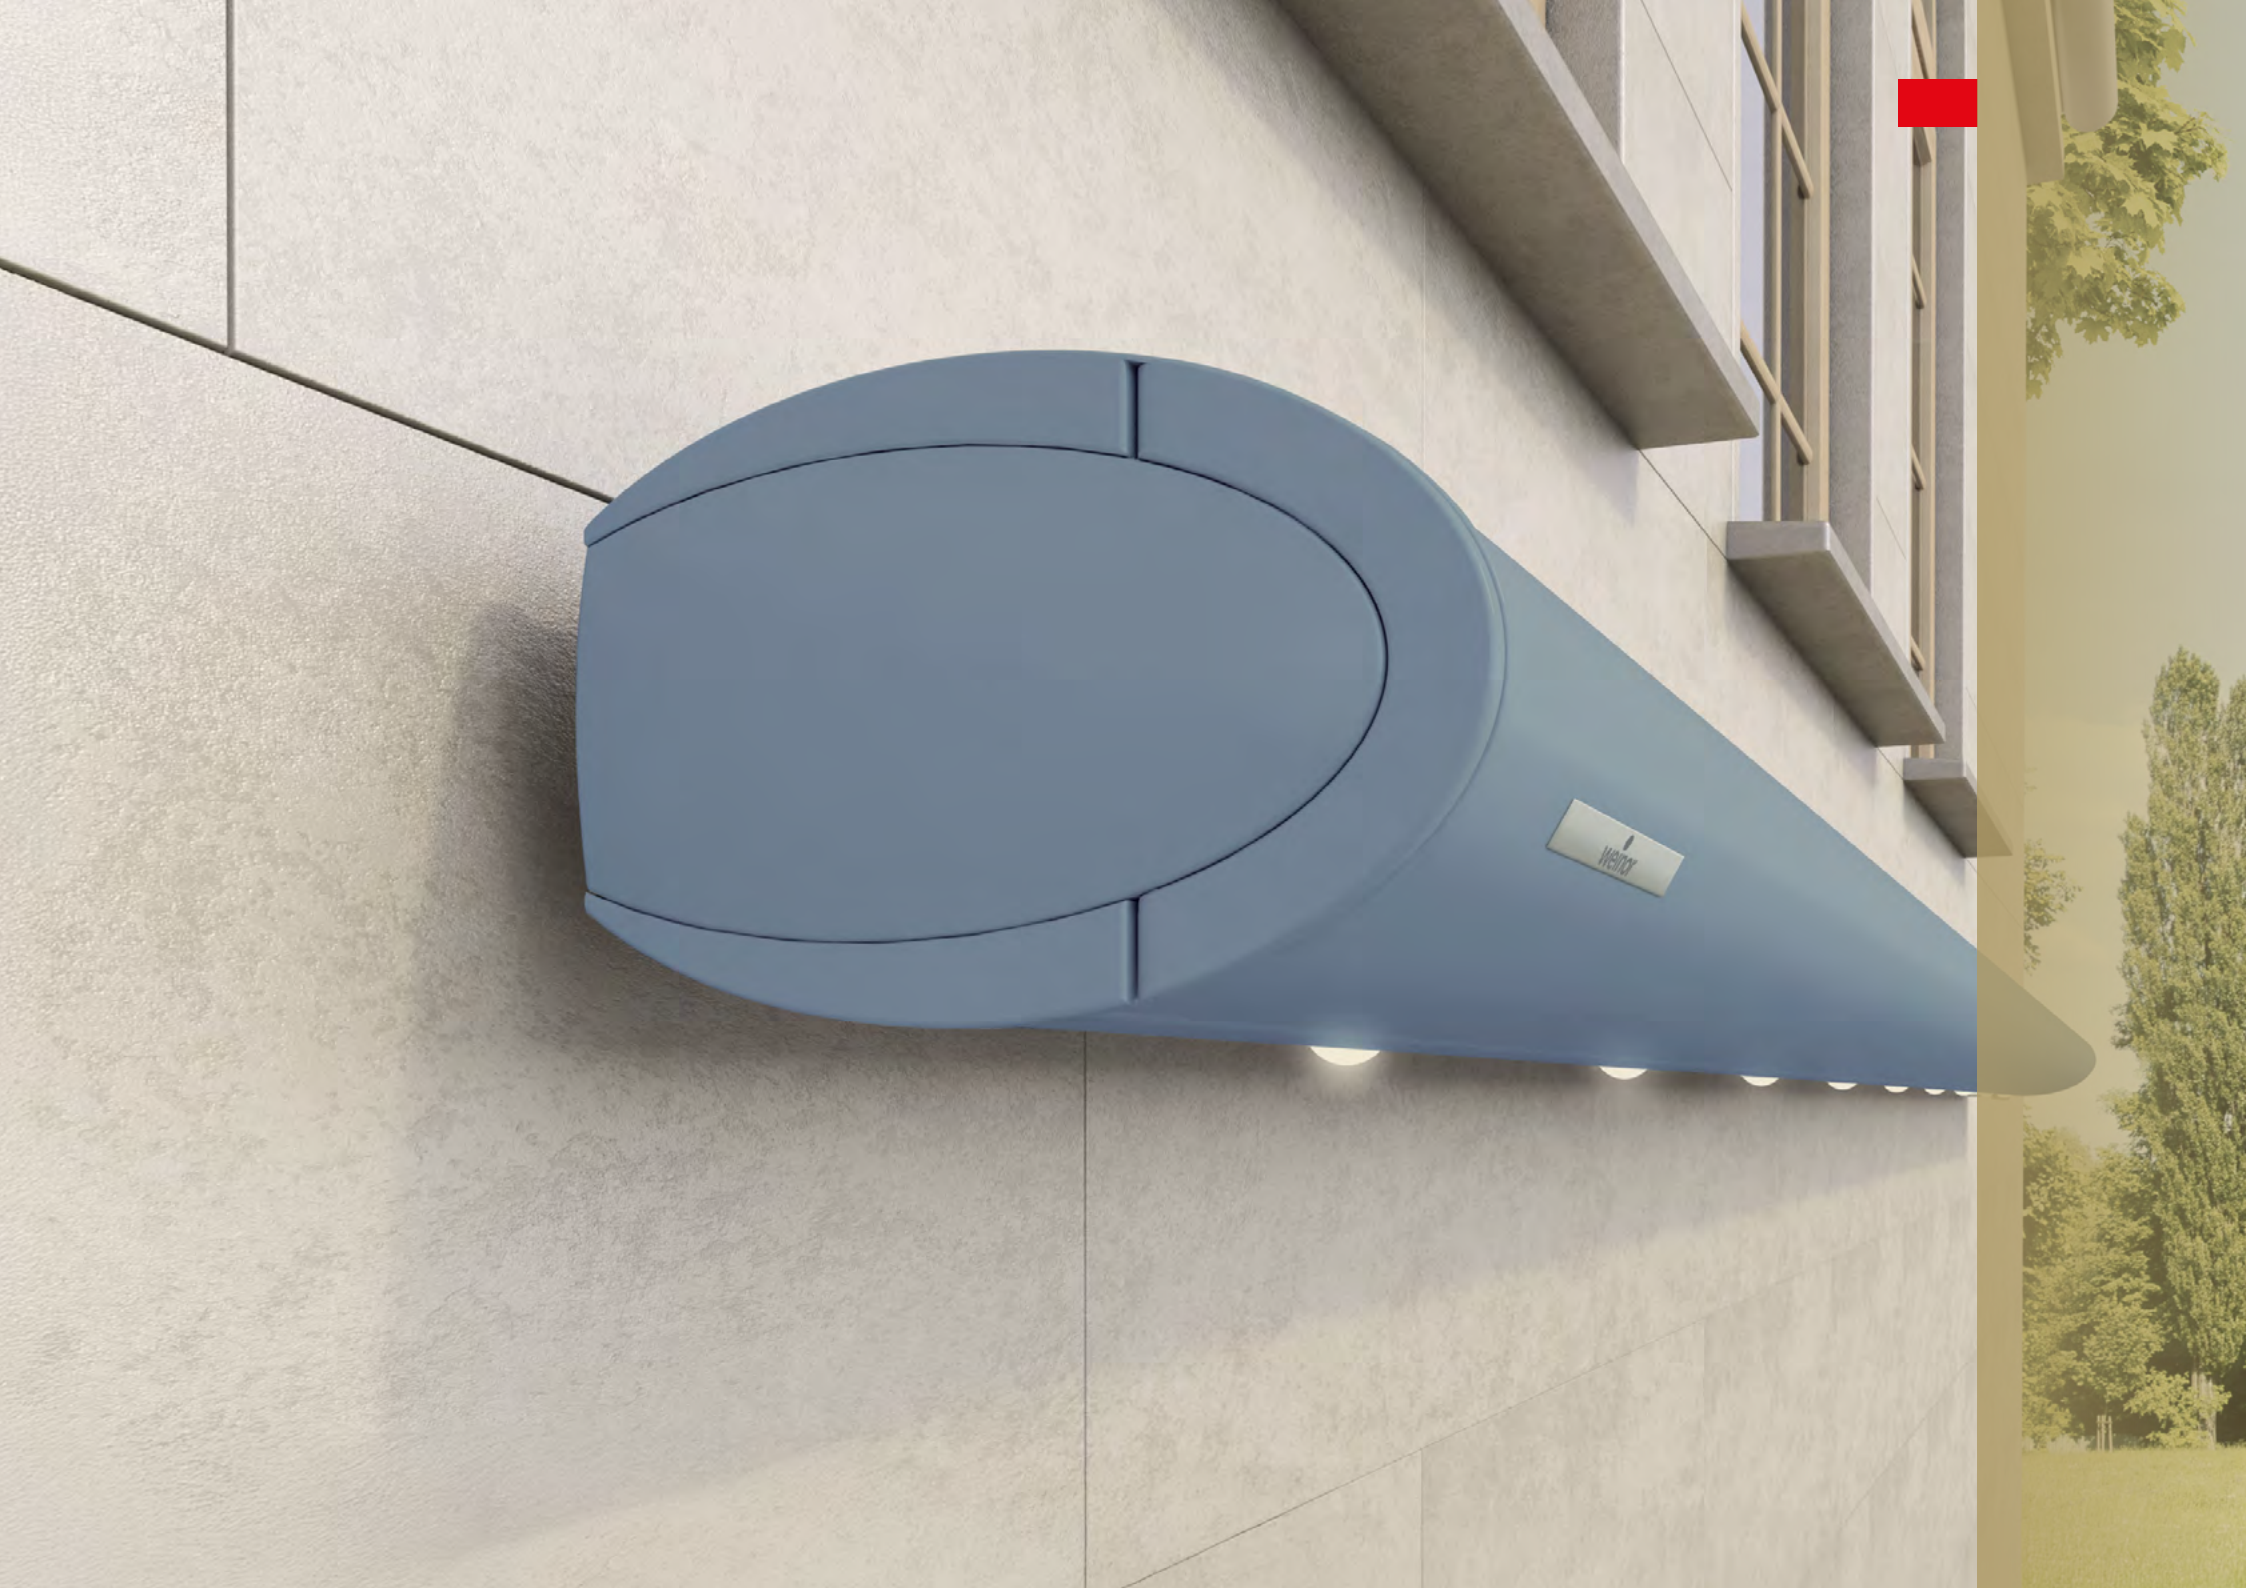

Flexible installation with versions
for several installation situations.

I/K/N 2000 is a folding arm awning for situations where standard solutions reach their limits. It was developed to enable flexible adaptation to different structural conditions – unobtrusively, functionally and reliably.

Depending on the installation situation, the awning can be installed directly on the wall, equipped with an additional back plate or integrated almost invisibly into a facade niche. It also fits in harmoniously where little space or special architectural specifications have to be taken into account.

The reserved design language supports a calm overall picture on the facade. At the same time, the proven construction ensures that the fabric and technology are accommodated protected and that the awning functions reliably in everyday life.

Colours, fabric patterns and equipping options can be customized to suit buildings and use. I/K/N 2000 thus offers a solution which does not come to the fore – but fits exactly where flexibility is called for.

OVAL DESIGN

The oval look of these awnings combines protection and lightness. Its semi-circular cassette with its elegant appearance and discreet front profile reliably encloses fabric and technology – keeping them permanently protected against the elements. At the same time, the round design is pleasantly soft and blends harmoniously into a wide variety of architectures.

The organic lines add subtle accents to the facade and an elegant touch to the exterior area. This makes oval awnings an ideal choice for everybody who values reliable function and a soft, elegant appearance.

Mature technology, durable materials and optional equipment such as LED lighting or the VarioShade valance open up a wide range of possibilities. This creates a protected open space which provides a feeling of protection – and makes it an outdoor place outside you can enjoy with all your senses.

A modern outdoor patio area featuring a large, dark red retractable awning extending over a paved deck. Under the awning, there is a contemporary outdoor seating arrangement with dark frames and light-colored cushions. To the right, a rectangular swimming pool with clear blue water is visible. The background includes a modern house with large glass windows and a grey fence. The overall scene is bright and sunny, with a clear blue sky.

OPAL DESIGN II

TIMELESS DESIGN FOR SPACIOUS SHADED AREAS

Technology and comfort
set in scene perfectly

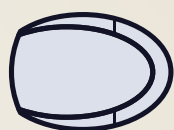

OPAL DESIGN II

Equipment

- ✓ Hook display
- ✓ Multi-section units for spacious patios*
- ✓ VarioShade valance with crank or motor drive*
- ✓ LED spotlights*

*optional

Profile awning cassette sketch

Opal Design II combines timeless elegance with modern comfort – perfect for everybody who wishes to enjoy their large patio stylishly and completely protected.

As a fully enclosed cassette awning, it reliably protects the fabric and technology against wind, rain and dirt. Its slightly curved border blends harmoniously with classical and modern facades, giving the outdoor area an elegant touch.

The end cap closure is a clever detail: If you look at the awning cassette from below, you will see a small crescent-shaped opening as long as the awning is not fully retracted. Once this crescent-shaped cap has disappeared, everything is securely closed.

What is so special?

The side end cap closure shows whether the awning is completely closed – the crescent-shaped gap disappears when everything is securely closed.

Optional equipment such as LED lighting or the extendable VarioShade valance also provide atmospheric light and protection against low sun and prying eyes. This enables you to enjoy your favourite place outdoors from your morning coffee to the evening hours.

Award-winning with:

A photograph of a modern outdoor terrace. A large, white retractable awning is extended over a wooden deck. On the deck, there is a dark green sofa with orange and grey cushions, a round wooden coffee table with fruit, a white wicker basket, and two black wire chairs with yellow seats. A large concrete planter with lavender is also on the deck. The terrace is adjacent to a building with light-colored wood siding and large glass windows. The background shows a green lawn and a blue sky with clouds.

SEMINA LIFE

THE STYLISH ALL-ROUNDER

Clear design, robust equipment,
convincing comfort

What is so special?

Individually adjustable headplate rings make the side covers a stylish design element.

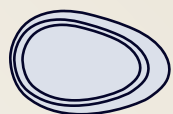

SEMINA LIFE

Equipment

- ✓ Modern design covers
- ✓ Slim design with only 2 wall brackets at the edge
- ✓ VarioShade valance with crank or motor drive*
- ✓ LED spotlights*

*optional

Profile awning cassette sketch

With its mixture of modern design, reliable technology and an attractive price-performance ratio, Semina Life is a genuine all-rounder.

Its fully enclosed cassette protects the fabric and technical components reliably against the elements. The elegant headplate rings in a stainless steel look on the side covers are a special detail: They perfectly round off the combination of frame colour and fabric design and set stylish accents on the facade.

Optional LED spotlights provide atmospheric light in the evening, while the extendable VarioShade valance provides better visibility and glare protection. Technically, the Semina Life convinces with the durable weinor LongLife arm, which keeps the fabric permanently taut and stable.

Modern design is combined with proven technology to create an awning which will add character to your patio and make it a place where you will enjoy spending time.

Award-winning with:

reddot award 2016
winner

CASSITA II

BEAUTIFUL SHADE FOR CLEAR SHAPES

Minimalist, well thought-out,
uncompromisingly elegant

What is so special?

Particularly flat design – blends elegantly and unobtrusively with modern architecture.

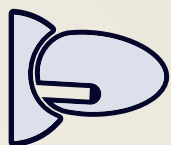

CASSITA II

Equipment

- ✓ New design with shapely aluminium caps
- ✓ Slim design with only 2 wall brackets at the edge
- ✓ LED spotlights*

*optional

Profile awning cassette sketch

Cassita II is the right choice for everybody who appreciates minimalist design. Its particularly flat design and clear lines allow the awning to almost merge with the facade. Concealed fasteners and only two wall connections accentuate its reduced, elegant character.

Its fully enclosed cassette protects the fabric and technical components reliably against the elements. For even more unity in the design, an optional gap infill profile can be used, which optically closes the transition to the wall.

Cassita II also convinces technically: The durable weinor LongLife arm ensures permanently taut fabric tension, optionally integrated LED spotlights create warm light for relaxed evenings. Cassita II combines purist architecture with reliable functionality for a stylish outdoors with a clear design language.

A photograph of a modern patio area. A large, striped awning in shades of beige and cream extends over the patio. The patio is furnished with white wooden chairs and a table. A large, grey planter box filled with lavender sits near the entrance of the house. The house has large glass doors and windows. The background shows a clear blue sky and some greenery.

SEMINA

RELIABLE SUN PROTECTION IN CLASSIC DESIGN

Quality which fits – visually, technically
and in terms of price

SEMINA

Equipment

- ✓ Semi-cassette, appealing and compact
- ✓ LED light bar*

*optional

Profile awning cassette sketch

What is so special?

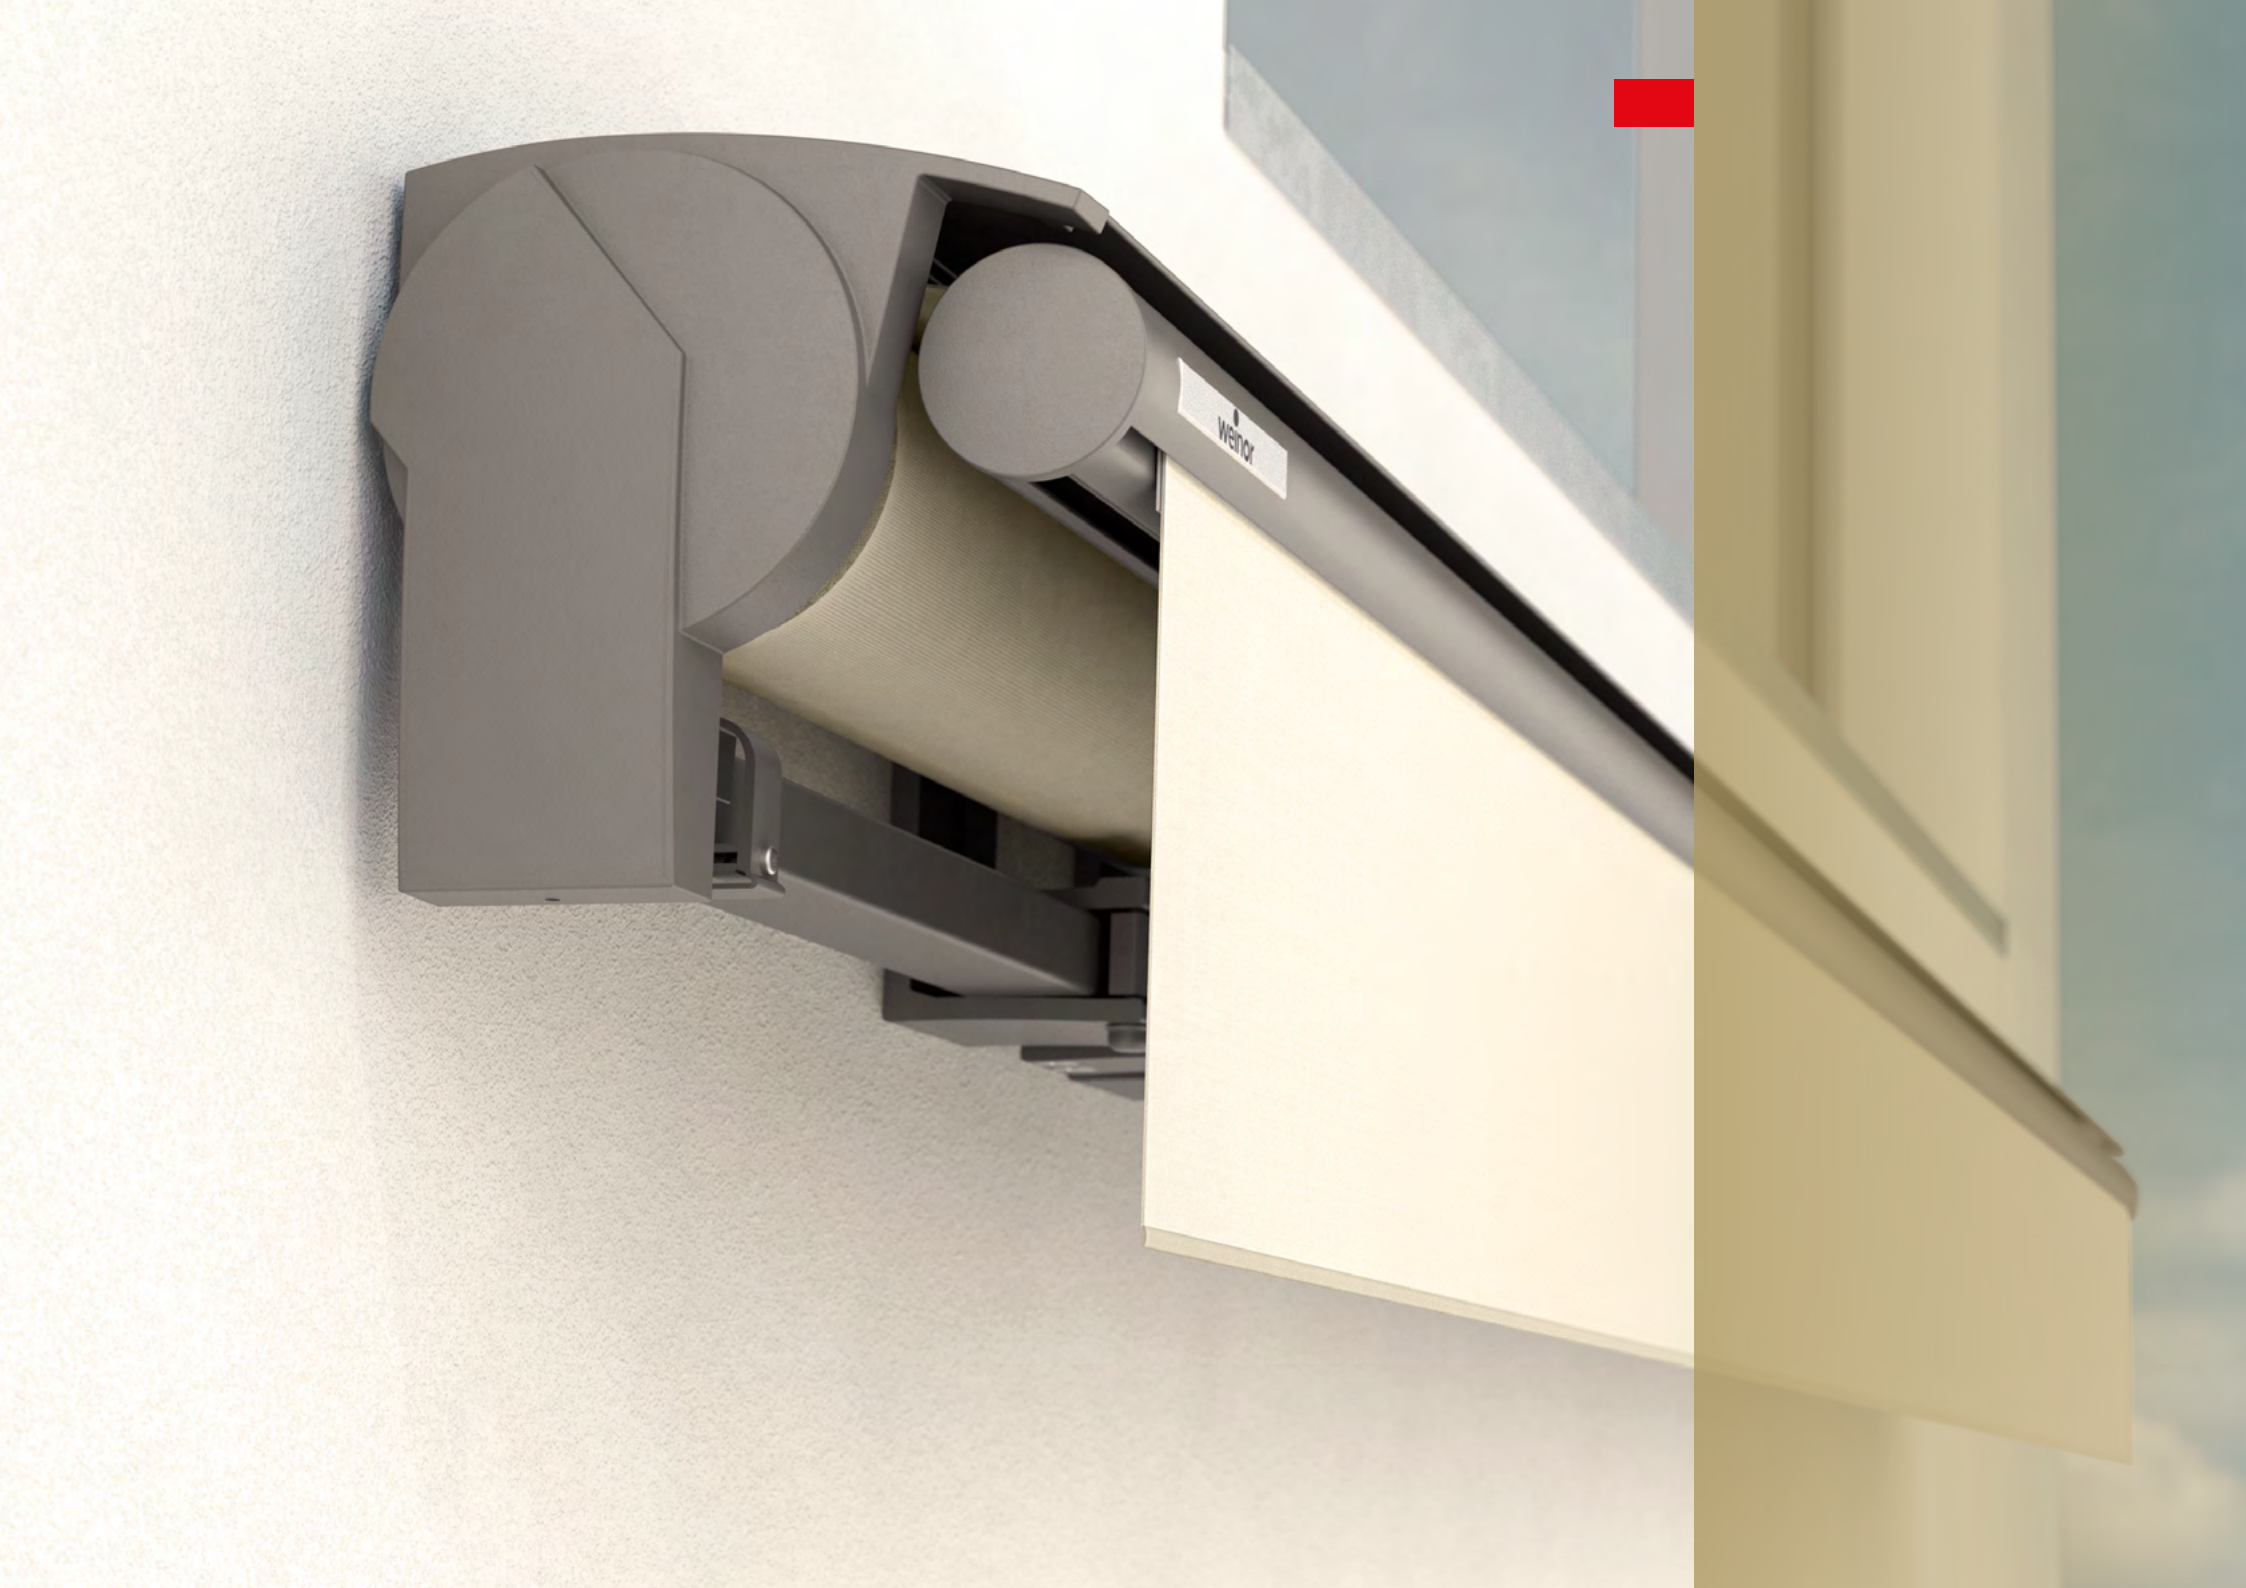

Proven technology and unobtrusive design –
■ strong in everyday life, fair in price.

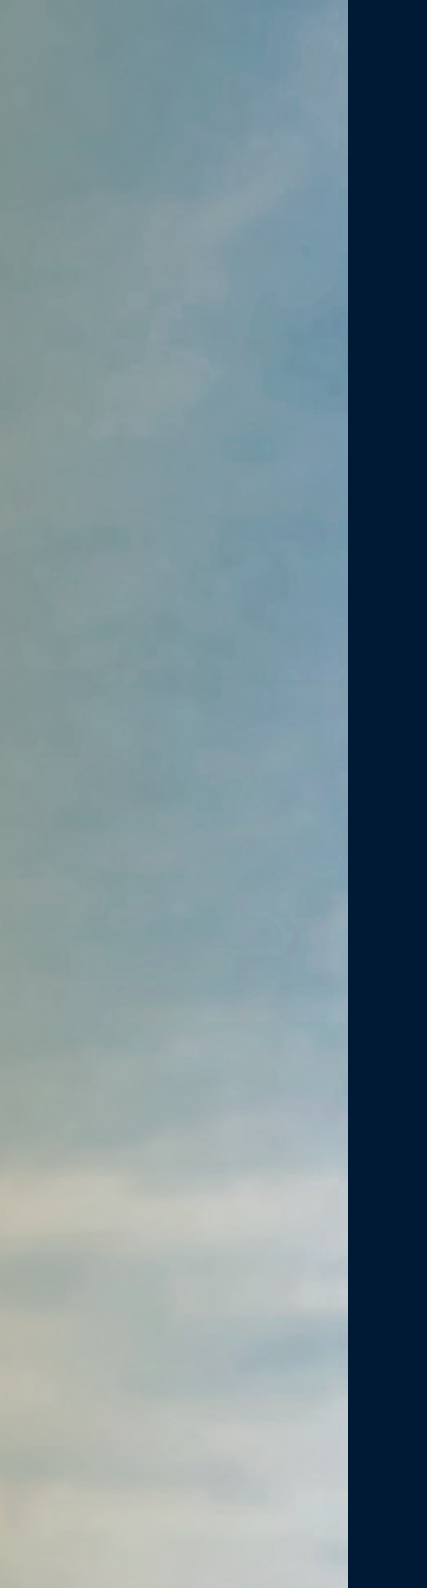

Semina is the right awning for everybody who relies on solid technology and proven quality and an attractive price-performance ratio. Its classic, rounded design seems timeless and matches your home subtly – no matter whether a city apartment, a terraced house or a detached house.

The semi-cassette protects the fabric against wind, rain and dirt. The durable weinor LongLife arm keeps it permanently firm and stable for reliable shade whenever you need it.

For even more comfort, your Semina can be equipped with LED spotlights for atmospheric light.

With well thought-out technology, high-quality workmanship and a wide range of colours and fabric designs, Semina fully adapts to your style – and remains pleasantly conservative pricewise..

OPEN AWNING DESIGN

Awnings with an open cassette are the uncomplicated solution for protected locations – for example under a roof overhang or on the balcony. Unlike cassette awnings, the technology remains visible here and the fabric is not completely enclosed. An optional rain roof can provide additional protection from above. Their slim design makes open awnings a subtle, versatile and affordable solution. The durable weinor LongLife arm ensures permanently taut fabric tension. A wide selection of fabrics and colours opens up the scope for individual design. This creates flexible sun protection which blends harmoniously into the architecture and makes protected outdoor locations even more inviting.

TOPAS II

VERSATILE SUN PROTECTION FOR PROTECTED LOCATIONS

Sturdy technology with an optional
rain roof

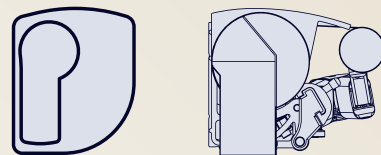

TOPAS II

Equipment

- ✓ Multi-section units possible for especially large patios*
- ✓ With a metal valance*
- ✓ VarioShade valance with crank or motor operation*
- ✓ LED light bar*

*optional

Profile awning cassette sketch Open / with safety shield

What is so special?

Optional rain roof protects the fabric in open construction – ideal for installation under roof overhangs.

Topas II is the perfect awning for anyone who appreciates simple, high-quality technology and clear functionality. It is particularly suitable for protected areas, such as under a roof overhang or balcony.

As an open awning, Topas II does not require a protective cassette, but can be equipped with an optional rain roof – the fabric therefore remains almost completely protected from above.

With widths of up to 7 metres and a projection of up to 4 metres, it also offers reliable shade for larger patios. The proven weinor LongLife arm ensures a taut fabric and a long-lasting function.

Optionally, Topas II can be equipped with LED spotlights – for cosy hours in the evening. Moreover, a wide range of colours and fabric designs exist which enable matching the awning perfectly to your home.

A modern pergola awning with white slats and dark brown beams is installed on a rooftop terrace. The terrace has a wooden deck and a glass railing. In the foreground, there is a grey sofa with a red and white patterned cushion, a low white coffee table with a glass of red wine, and a small table with a teapot and cups. A vase of orange flowers sits on the deck. The background shows a panoramic view of a city with a large body of water and many sailboats under a blue sky with light clouds.

PERGOLA AWNINGS

Pergola awnings combine airy awning flair with stable guidance and a secure hold. For spacious patios, windy locations and many lovely hours outdoors, even in the rain.

WEINOR PERGOTEX II

OUTSIDE, WHENEVER YOU WANT – REGARDLESS OF THE WEATHER

Openness or protection at the touch of a button

WEINOR PERGOTEX II

Equipment

- ✓ Convertible Folding System
- ✓ With a rainproof PVC folding roof
- ✓ Stable aluminium fabric protection roof
- ✓ LED spotlights*

*optional

What is so special?

- Weather-independent comfort,
- flexibly extendable.

With weinor PergoTex II you decide the extent of openness or protection outdoors which just feels right. The textile folding roof can be opened or closed at the push of a button – for sun, fresh air or a reliably protected area under the roof.

The rainproof pergola awning allows you to use the patio regardless of the weather. The Pergona® collection for roof covering

is a specially developed, waterproof and robust fabric solution. Pergona® classic is almost opaque and ensures a calm, continuous light atmosphere, while Pergona® translucent allows significantly more daylight in and creates a brighter, more open feeling of space with the same protective effect.

Complemented by frameless glass sliding doors, weinor PergoTex II becomes a Glasoase® – a wellness area full of light and lightness which can be opened flexibly. The frameless elements enclose the area transparently, protect against rain and draughts and create an atmosphere of protection and openness simultaneously.

Award-winning with:

reddot award 2016
best of the best

EXTENDABLE
as a weinor Glasoase®

PLAZA VIVA

INTELLIGENT PROTECTION FOR OUTDOORS IN ALL WEATHER CONDITIONS

Textile sun and weather protection with extra stability

PLAZA VIVA

Equipment

- ✓ Stable guide system with post and fabric tension for more wind and rain protection
- ✓ Telescopic post for controlled drainage*
- ✓ VarioShade valance with crank or solar drive*
- ✓ LED spotlights*

*optional

Plaza Viva is the right solution if you appreciate the lightness of an awning, but want more stability than a classic folding arm awning can offer. The side rail guide and front posts ensure that the fabric remains guided reliably and also appears smooth running and controlled on larger surfaces.

This creates a protected area which is particularly suitable for patios where classic folding arm awnings reach their limits. Plaza Viva combines openness at the front with additional guidance, thus ensuring greater operating safety in everyday use.

The telescopic post is a central feature: when it rains, the frame can be lowered in a targeted manner, enabling water can drain off in a controlled manner.

What is so special?

The telescopic post can be lowered when it rains – the water drains off, the fabric is protected and you also can continue to enjoy your patio during light rain showers.

This protects the fabric and allows further patio use even under changing conditions without having to react spontaneously or rearrange any items.

Plaza Viva can be expanded individually, for example with lighting, sun protection or a heater. This creates a textile roofing which gives you more scope for everyday life – an airy appearance, stable guidance and is clearly designed for use.

Award-winning with:

CONSERVATORY AWNINGS

Conservatory awnings make life under glass even better. They prevent your conservatory or the area under your patio roof from heating up on sunny days – and thus ensure a glare-free and pleasantly tempered ambience. This makes them a sustainable alternative to air-conditioning: They regulate the climate naturally and save energy.

No matter whether installed under the glass for a subtle solution with a homely atmosphere or on the roof for maximum area efficiency – conservatory awnings from weinor are technically mature, flexibly applicable and blend harmoniously with your architecture. With their variety of colours, fabrics and equipment, you can design the character of your covered outdoor area fully to your liking – from light, airy sun protection to elegant sun shade for large areas.

SOTTEZZA

ATMOSPHERE UNDER GLASS

SOTTEZZA

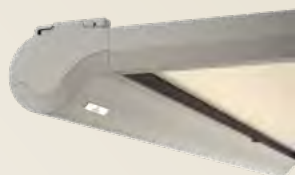

Equipment

- ✓ Can be retrofitted under a variety of different roof structures
- ✓ Optimum complement for weinor patio roofs
- ✓ LED spotlights*
- ✓ Very high fabric tension due to the counterbalance system
- ✓ Also provides shading for large surfaces with multi-section units
- ✓ Lateral fabric guide with Zip OptiStretch*

*optional

Profile variants

Sottezza Originale for
Terrazza Originale

Sottezza Pure for Terrazza
Pure, Terrazza Pure MAX
and Terrazza Semptra

What is so special?

Long-lasting solution under glass –
reliable sun protection and
a homely atmosphere in one.

Sottezza is an awning under glass for conservatories and glass roofs. It is mounted underneath the glazing and ensures that light and heat in the room can be controlled in a targeted manner – without losing the transparency of the roof.

The textile sun protection reduces direct sun radiation considerably. This contributes to a noticeably more pleasant room climate and protects against glare, for example when working, reading or relaxing in the conservatory.

Since the awning is located under the glass, it remains permanently clean and protected against external influences. When the cassette is retracted, it remains almost invisible – your architecture appears clear and open. In the evening, the optional integrated LED lighting transforms your patio into an atmospheric oasis, where the day draws to a gentle end.

Award-winning with:

WGM TOP

FLEXIBLE PROTECTION ON THE GLASS

WGM TOP

Equipment

- ✓ Can be retrofitted to a wide range of roof constructions
- ✓ Lateral fabric guide with Zip OptiStretch*
- ✓ A wide range of installation solutions
- ✓ Sun, wind and rain sensors*
- ✓ Also shades large areas
With multi-section units

*optional

What is so special?

Can be installed on glass – ensures cool heads and a pleasant climate under all patio roofs.

WGM Top is an external conservatory awning which is installed above the glass roof. It takes effect where heat is generated: even before the sunlight reaches the glass.

Due to the external sun protection, the heating up of the conservatory is reduced significantly. This ensures a more pleasant room climate and makes the conservatory a place where you like to stay, even on sunny days.

Thanks to its stable construction, the fabric also remains reliably tensioned, even in the wind. This is ensured by the proven weinor Stretch and OptiStretch technologies: Stretch keeps the fabric permanently under even tension, ensuring a smooth, even appearance. OptiStretch further enhances this effect on larger constructions and supports lateral guidance – for an especially smooth fabric surface even in more demanding conditions.

With a wide range of colours and fabrics, WGM Top can be designed to fit your home while bringing comfort and lightness outdoors.

A modern building with a light-colored, horizontally-slatted facade. A large window is partially covered by a light-colored vertical awning. The building is situated on a wooden deck overlooking a body of water, with mountains in the background. A small red square is visible in the top left corner of the image.

WINDOW AND VERTICAL AWNINGS

Effective sun and privacy protection exactly when you need it – on windows, the patio or in the Glasoase®. For more shade, more privacy and a pleasant climate.

A modern two-story house with a large glass balcony and a retractable awning over the patio. The house is white with large glass windows and doors. The balcony has a glass railing. The awning is white and extends over the patio area. The patio is furnished with a sofa, coffee table, and chairs. The house is surrounded by greenery and a lawn.

VERTITEX II

COMPACT VISION AND SUN PROTECTION FOR SEVERAL INSTALLATION SITUATIONS

Subtle design, versatile use

VERTITEX II

Equipment

- ✓ weinor Opti-Flow-System® supports the whole roller tube
- ✓ Safely guided – even in the wind
- ✓ Can be retrofitted to patio roofs, conservatories, pergola systems and windows in a variety of ways

Profile variants

Square

Round

ZIP guide

Rail guide

Rope guide

What is so special?

Small cassettes for up to 6 m width.

Award-winning with:

VertiTex II is the most versatile vertical awning from weinor – slim in design, strong in function. With its particularly compact cassette, it is ideal for windows, patio sides or Glasoasen®, where subtle integration is important.

It protects against sun, glare and prying eyes reliably – exactly where classic awnings reach their limits. Three guiding systems can be chosen: Rope, rail or the extra-stable ZIP guide, which also keeps the fabric safe in wind.

The **screens by weinor® collection** is available for even more creative freedom. The specially developed fabrics range from transparent screens which maintain views and daylight to opaque versions for maximum privacy and shade. Your VertiTex II thus becomes perfectly fitting visual and sun protection – technically as well as visually.

VertiTex II also adapts visually to your style: With over 200 frame colours and high-quality patterns – from subtle to striking.

PARAVENTO

PERFECTLY COMPLEMENTED AT THE SIDE – FOR MORE PROTECTION AND PRIVACY

The practical side awning for your outdoors

PARAVENTO

Equipment

- ✓ Ideal for retrofitting
- ✓ For even more protection against the sun, wind and prying eyes
- ✓ With an oblique cut for angled awning front edges*
- ✓ Colour harmony through accurate coordination with your existing construction

*optional

What is so special?

Subtly hidden in the cassette,
quickly extended to the side.

Paravento makes your patio really complete. The side awning reliably protects against prying eyes, low sun and light wind – for relaxed hours without any side interference.

The compact housing blends harmoniously with the design of your folding arm awning or patio roof and can be colour-matched accurately to the existing frame. Available with all my collection fabrics, your Paravento matches your awning or sets a design accent consciously.

With a few simple steps, Paravento is pulled out manually and fixed to the post on the wall. For even more flexibility, it is also available with an oblique cut – ideal for angled awning front edges.

If not currently needed, the fabric disappears elegantly into the cassette – invisibly and is safely stored until next used.

This creates a protected retreat on your patio – stylishly integrated, quickly rolled up and rolled in.

A photograph of a rooftop terrace at sunset. In the foreground, a modern, light-colored sofa with a patterned cushion is positioned on a wooden deck. To the left, a portion of a striped cushion is visible. The terrace is enclosed by a glass railing. In the background, a city skyline is visible under a warm, orange-hued sky. The skyline includes various buildings, including a prominent tower with a spherical top. The overall atmosphere is serene and modern.

ARCHITECTURE & ATMOSPHERE

Every home has its own character – and an awning should pick it up and not conceal it. Find the awning from weinor which fits your home:

Colours, shapes and materials can be tailored to the facade, windows and the style of your house and your taste in a targeted manner – from restrained and harmonious to deliberately accentuated. This creates an awning which is simply harmonious and combines protection with atmosphere.

AWNING FABRICS

COLOUR. LIGHT. CHARACTER.

The awning fabric is more than a functional element. It determines how your outdoors feels. It filters the light, immerses your patio in warm or cool nuances, creates security or openness.

Light shades let plenty of natural light onto the patio and appear light and airy. Darker colours create depth, set contrasts and give your exterior area its own handwriting. Structure, sample and light transmission characterise the atmosphere exactly according to your wishes.

my collections 2

With over 170 patterns, our awning fabrics open up countless design possibilities – from quiet, fine structures via striking samples to clear, single-colour surfaces. Different fabrics, woven fabric and surface effects affect light, shade and depth on your patio. This creates the atmosphere which blends with your architecture, style and personal feeling.

How gently the light falls, how colours take effect during the course of the day and how surfaces interact with sun and shade is not only determined by colour, but also by the interplay of material, structure and sample. Curtain-like soft, textile lively or in a subtle texture – each fabric forms its own, sensual surface.

Your fabric is not merely sun protection. It is design, colour, structure and light effect in one – and thus an essential part of your outdoor atmosphere.

Find your individual fabric under:
www.weinor.com/awning-fabrics

EXPERIENCE YOUR FAVOURITE FABRICS LIVE

Order your favourites directly to your home. Original samples show how colour, structure and light effect work in your personal environment.

AWNING FABRICS

LASTING QUALITY

To ensure that your fabric will accompany and protect you for many summers to come (weinor awning fabrics offer a UV shield of 93.3 to 97.5%), we rely on high-quality materials and careful processing. The colour pigments are already embedded in the material during the spinneret dyeing process during fibre production. This means that the colour sits deep in the fibre and remains brilliant permanently – even in intense sunlight.

High-quality equipment ensures that contaminants will bead off in the long term. Modern awning fabric also has water-repellent properties – from a pitch of 14 degrees, rain runs off reliably. Of course, all weinor fabrics are certified according to OEKO-TEX® Standard 100. In order to take sustainability into account, weinor launched the first sustainable awning fabric collection for outdoor use: modern basics blue® in 2021.

The woven fabric is 85% recycled PET and is certified according to the Global Recycled Standard. Colour brilliance, haptics and performance of the fabrics naturally meet the weinor standards. The screens by weinor® collection is especially available for vertical sun protection. The special fabrics are specifically designed for vertical awnings and reduce heat and glare while preserving the view outdoors.

No matter whether it's a cosy textile effect, high air permeability or maximum robustness: matching woven fabrics are available for different requirements. This creates a consistent textile concept – attuned to light, use and architecture.

What is so special?

Colours which remain for a long time – because the fibres are always completely imbued (like a carrot) and not superficially.

FRAME COLOURS

INDIVIDUAL AND HARMONIOUS

With more than 200 frame colours, weinor offers you almost unlimited design possibilities.

Whether tone-on-tone with the facade and fabric or deliberately rich in contrast – you determine what suits you.

All colours are applied in a high-quality powder coating process at our own factory in Germany and are particularly durable, UV-resistant and easy to maintain. This way your stylish exterior area will remain permanently beautiful.

47 standard RAL colours

Uniform colour – guaranteed

Careful processing ensures that colours and gloss levels match accurately with all your products – even with subsequent additions or retrofits.

9 conservatory trend colours

Choose from an abundance of high-quality colours:

- 47 standard RAL frame colours, satin finish
- 9 scratchproof, resistant conservatory trend colours with an elegant textured look
- More than 150 special RAL colours

Colour manufacturers make every effort to guarantee colour shade stability. Despite this, as a result of the ban on the addition of heavy metals, it therefore cannot be fully ruled out that in particular the colour flame red (RAL 3000) may fade during the course of time.

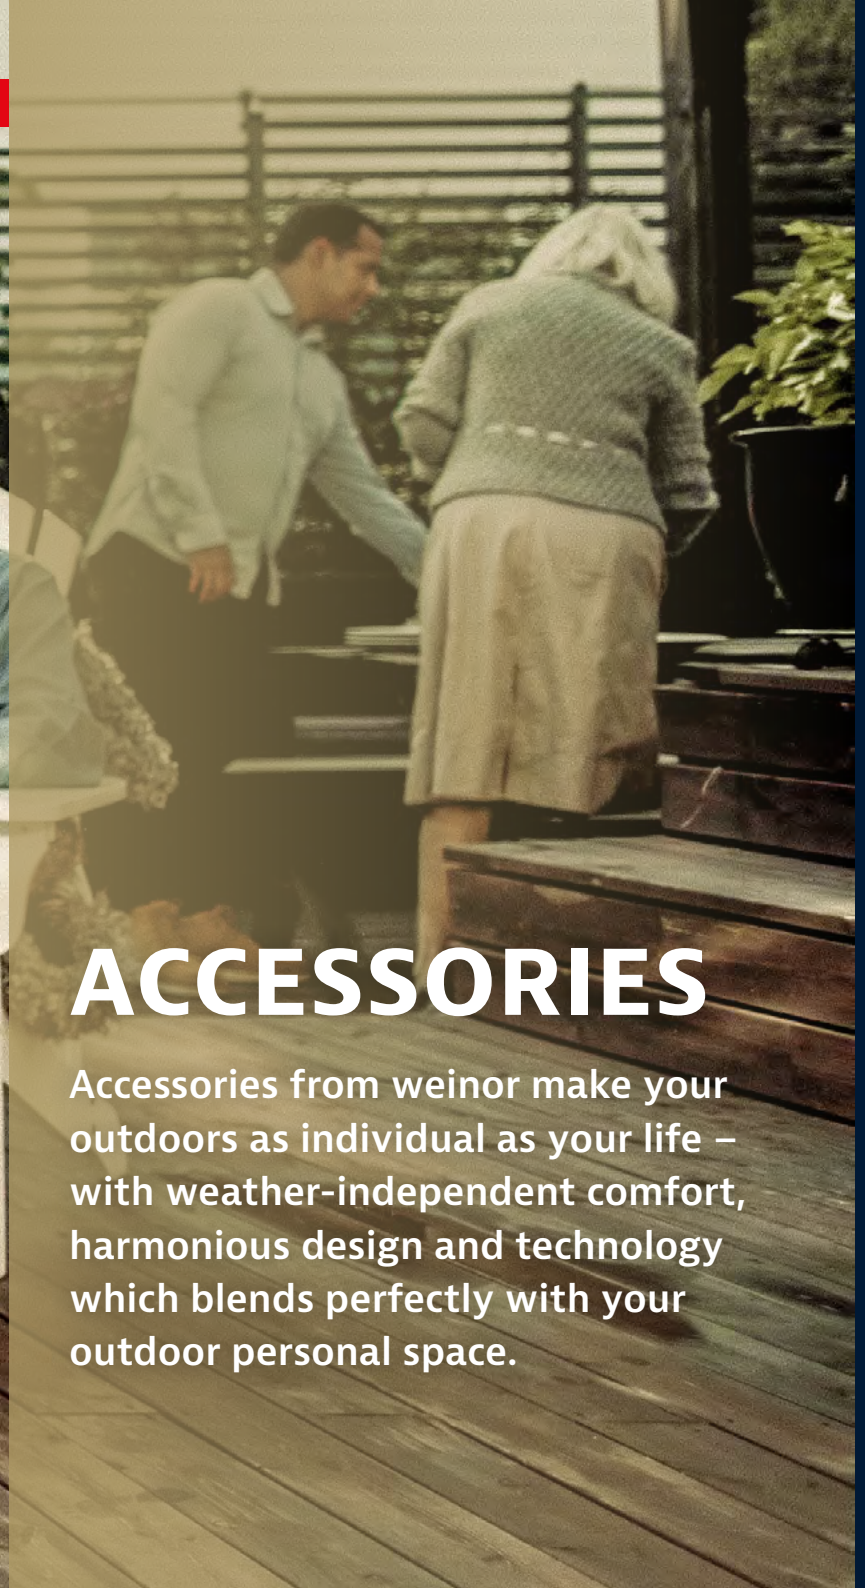

Further information about our world of colour is available here:
www.weinor.com/architecture-mood

What is so special?

Sealed all around. Permanently protected. Thanks to premium powder coating from weinor – without open cutting edges, without corrosion.

ACCESSORIES

Accessories from weinor make your outdoors as individual as your life – with weather-independent comfort, harmonious design and technology which blends perfectly with your outdoor personal space.

ACCESSORIES

REALLY YOUR OUTDOORS

Light, warmth, openness and protection – design your outdoors just as it feels right and harmonious for you. For atmospheric evenings, weather-independent protection and more cosy living outdoors.

Your outdoors changes with the day and the weather – and you determine how it should feel.

Dimmable LED lighting makes the evening longer, heating systems provide cosiness on cool days. The VarioShade valance protects you against low sun and prying eyes – at the touch of a button and elegantly integrated.

Everything can be controlled individually, if desired via remote control or Smart Home. Unobtrusive technology – which is nonetheless always there for you.

For even more security and comfort, weather sensors automatically react to changing conditions, thus protecting the technology and the fabric.

This creates an individually coordinated intelligent system. And a place which feels just as you need it.

For further inspiration, visit [weinor.com](https://www.weinor.com)

WHICH CONTROL UNIT MATCHES YOUR OUTDOOR FEELING?

Comfort starts with control: At weinor, you can choose how to operate the awning, light, heating and privacy protection – simply by crank, conveniently by remote control or very smartly by app. Everything is possible. And everything matches.

Manually ★ – classic with a crank

Ideal when no power connection is available or when you deliberately wish to refrain from the use of technology. The awning can be manually operated easily – electricity-free, independently and can be used in almost any construction situation.

Comfort ★★★ – everything under control

With a remote system, you can operate your awning comfortably – in addition, you can choose lighting (also dimmable) and heating if desired. Everything can be easily controlled at the touch of a button – for atmospheric moments as you like them.

Base ★★ – convenient with remote or automatic control

Control your awning easily with a hand transmitter or switch – with optional automatic weather control which reacts independently in the sun, wind or rain. Practical, reliable and without much technical effort.

Smart ★★★★★ – networked and foresighted

By app, time control or voice command: Your outdoor equipment is intelligent. Thanks to the Smart Home connection, you enjoy maximum comfort – fully automatically, exactly according to your rhythm of life.

Important details: All the illustrated equipment items are weatherproof outdoor furniture and accessories. **Fabric qualities:** weinor awning fabrics meet strict quality requirements and are produced using state-of-the-art production technology. Despite this, blemishes like creases, rippling in the seam and hem area, overstretching in the hem area and honeycombing cannot be ruled out. This has no negative impact on the quality and operating life and are not a reason for rejection. Further information: www.weinor.com/awning-knowledge **Awnings and conservatory awnings:** must be retracted when it is raining or windy – risk of pooling! Fabrics which have become wet may have more wrinkling, honeycombing, water stains and mildew. They should therefore be extended again to dry when the weather is better. **Frame colours:** depending on the frame colour ordered, we deliver all small parts, as well as gear handles and gear boxes in black (similar to RAL 9005), white (similar to RAL 9016), or in grey (similar to weinor 7319).
