LIFE OUTDOORS

We take a breather, laugh and dream outdoors. A patio roof from weinor transforms your patio to a place for unforgettable moments: when sunlight is cast gently through glass, summer rain falls calmingly on the roof or the evening sky above you darkens slowly, your outdoors is a where you feel at home.

Enjoy the feeling of being outdoors – secure, relaxed and carefree.

GLASS PATIO ROOFS

Outdoors is more than a location – it is a feeling of freedom, light and expanse. With a glass patio roof, a protected space between home and the sky arises, which accompanies everyday routine and special moments alike.

weinor patio roofs follow different architectural principle: rigidly cubic, a balanced pitch or classical rounding. Each design envelops its individual effect – from clear horizontalness via proportioned roof-lines to soft-edged profiles.

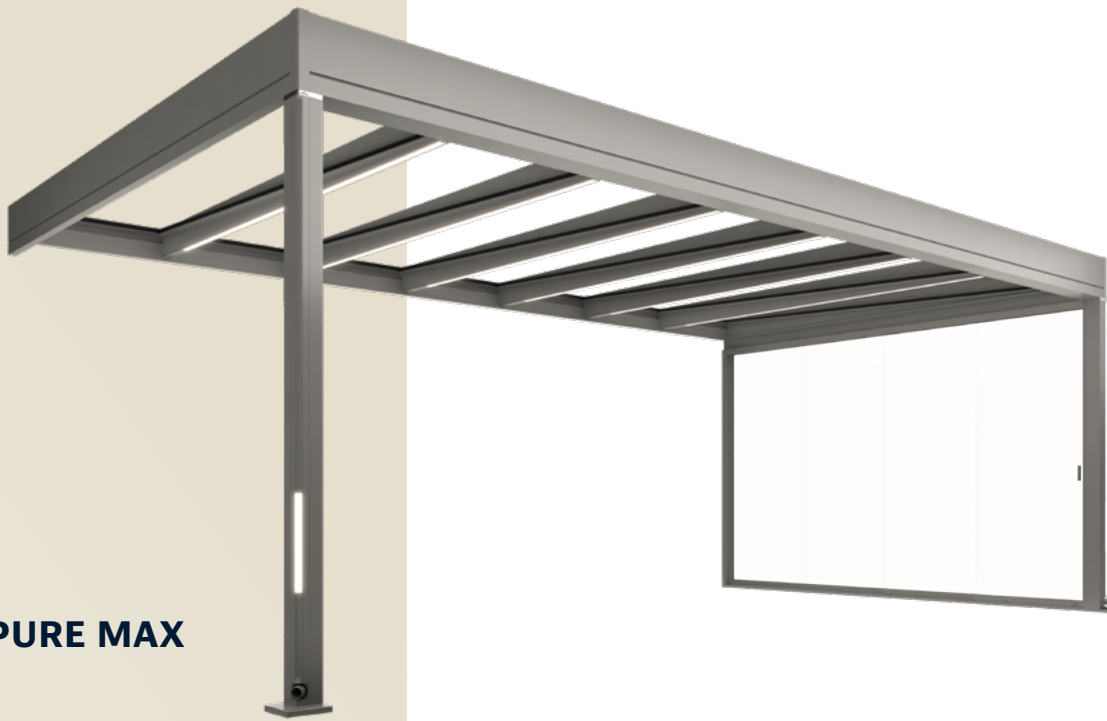

Thus, a transparent transition between indoors and outdoors arises, which makes your patio your favourite place even more frequently – weather-independent. For even better security, all our glass patio roofs can be extended as a weinor Glasoase®.

TERRAZZA PURE MAX

CLEAR SHAPE. MAXIMUM STABILITY.

The Terrazza Pure MAX is a glass patio roof for sophisticated architecture. With straightforward design, consistently constructed and determined for large spans

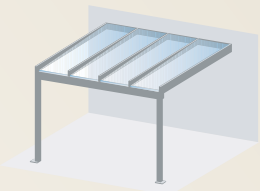

TERRAZZA PURE MAX

Equipment

- ✓ Large spans without middle posts
- ✓ Integrated guttering in the roof profile
- ✓ Designed for spacious patio areas
- ✓ Dimmable LED lighting for atmospheric evenings*
- ✓ Can be combined with sun protection on or under glass*

*optional

Patio roof profile sketch

■ **EXTENDABLE**
■ as a weinor Glasoase®

What is so special?

A well thought-out package consisting of guttering and a roof support – optimised water drainage, even when it rains heavily.

Terrazza Pure MAX is the glass patio roof everybody who wishes to experience expanse and attaches importance to design clarity and calmness. Generous roof surfaces create an open sense of space – without any disturbing middle post in the field of vision. This gives rise to a free transition between the home and garden, which consciously provides a free view outdoors.

The clear line layout is supported by integrated guttering: Rainwater is drained off in a controlled

way without visibly disrupting the architecture. Technology takes a back seat, design ´ remains in the foreground.

Designed according to your wishes and attuned to your lifestyle, the Terrazza Pure MAX can be extended step-by-step – with sun protection, glazing and lighting. Therefore, your patio roof grows with your requirements and, if wanted, becomes a fully protected Glasoase®.

TERRAZZA PURE

LINEAR. PRECISE. TIMELESS.

Cubic glass patio roof with integrated guttering – clear expression, well thought-out details

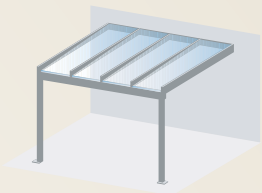

TERRAZZA PURE

Equipment

- ✓ Cubic design with integrated guttering
- ✓ Can be combined with awnings on or under glass*
- ✓ Dimmable LED lighting for atmospheric evenings*

*optional

Patio roof profile sketch

■ **EXTENDABLE**
■ as a weinor Glasoase®

What is so special?

Invisibly integrated Glass gradient
in the lateral roof support –
■ clear lines.

Award-winning with:

Terrazza Pure follows a clear, architectonic concept: a consistent cubic shape which self-evidently blends with modern facades. Here, the roof pitch is integrated into the framework assembly and therefore remains invisible from the outside. Therefore, calm precise clear contours without visible inclination or structural compromise arise.

Rainwater is drained off in a controlled manner without interrupting the form. Glass and aluminium blend as a stable construction, combining openness and protection. Combined with sun protection under or on glass as well as side glazing, a flexibly usable exterior arises, extending the architecture and making it permanently useable.

TERRAZZA SEMPRA

ARCHITECTURE IN EQUILIBRIUM

Linear profile guidance is combined
with classical roof pitch

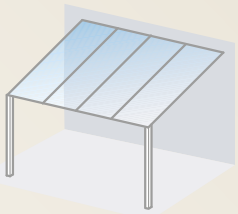

TERRAZZA SEMPRA

Equipment

- ✓ Timeless, linear design
- ✓ Proven roof construction with inclination
- ✓ Can be combined with awnings on or under glass*

*optional

Patio roof profile sketch

EXTENDABLE
as a weinor Glasoase®

What is so special?

A visible roof pitch
with clear lines.

Award-winning with:

Terrazza Semptra combines a clear, linear profile design with a consciously visible roof pitch as a calm architecturally familiar silhouette.

The inclined roof surface ensures controlled water drainage and blends harmoniously with existing roof landscapes. Glass and aluminium form a stable construction with modern, angular lines. Combined with awnings under glass and on glass as well as side elements, a protected exterior with a balanced presence arises.

TERRAZZA ORIGINALE

SOFT LINE. CLEAR CONSTRUCTION.

Rounded guttering and classical lines
with well-balanced proportions

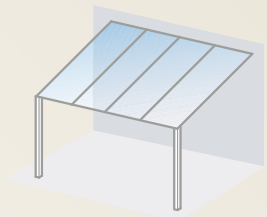

TERRAZZA ORIGINALE

Equipment

- ✓ Classically rounded profile design
- ✓ Proven roof construction with inclination
- ✓ Can be combined with awnings on or under glass*

*optional

Patio roof profile sketch

EXTENDABLE
as a weinor Glasoase®

What is so special?

Soft rounded guttering with classical profile geometry.

Award-winning with:

Terrazza Originale is characterised by soft rounded roof supports and clearly defined front design. Its profile geometry provides the patio roof with a classical look which is specially suitable for housing with traditional or detailed facade design.

The inclined roof surface supports reliable water drainage and accentuates the balanced form. The aluminium and glass construction combines proven technology and a timeless appearance. Therefore, an architectonic expansion arises, which maintains continuity and respects the character of the home.

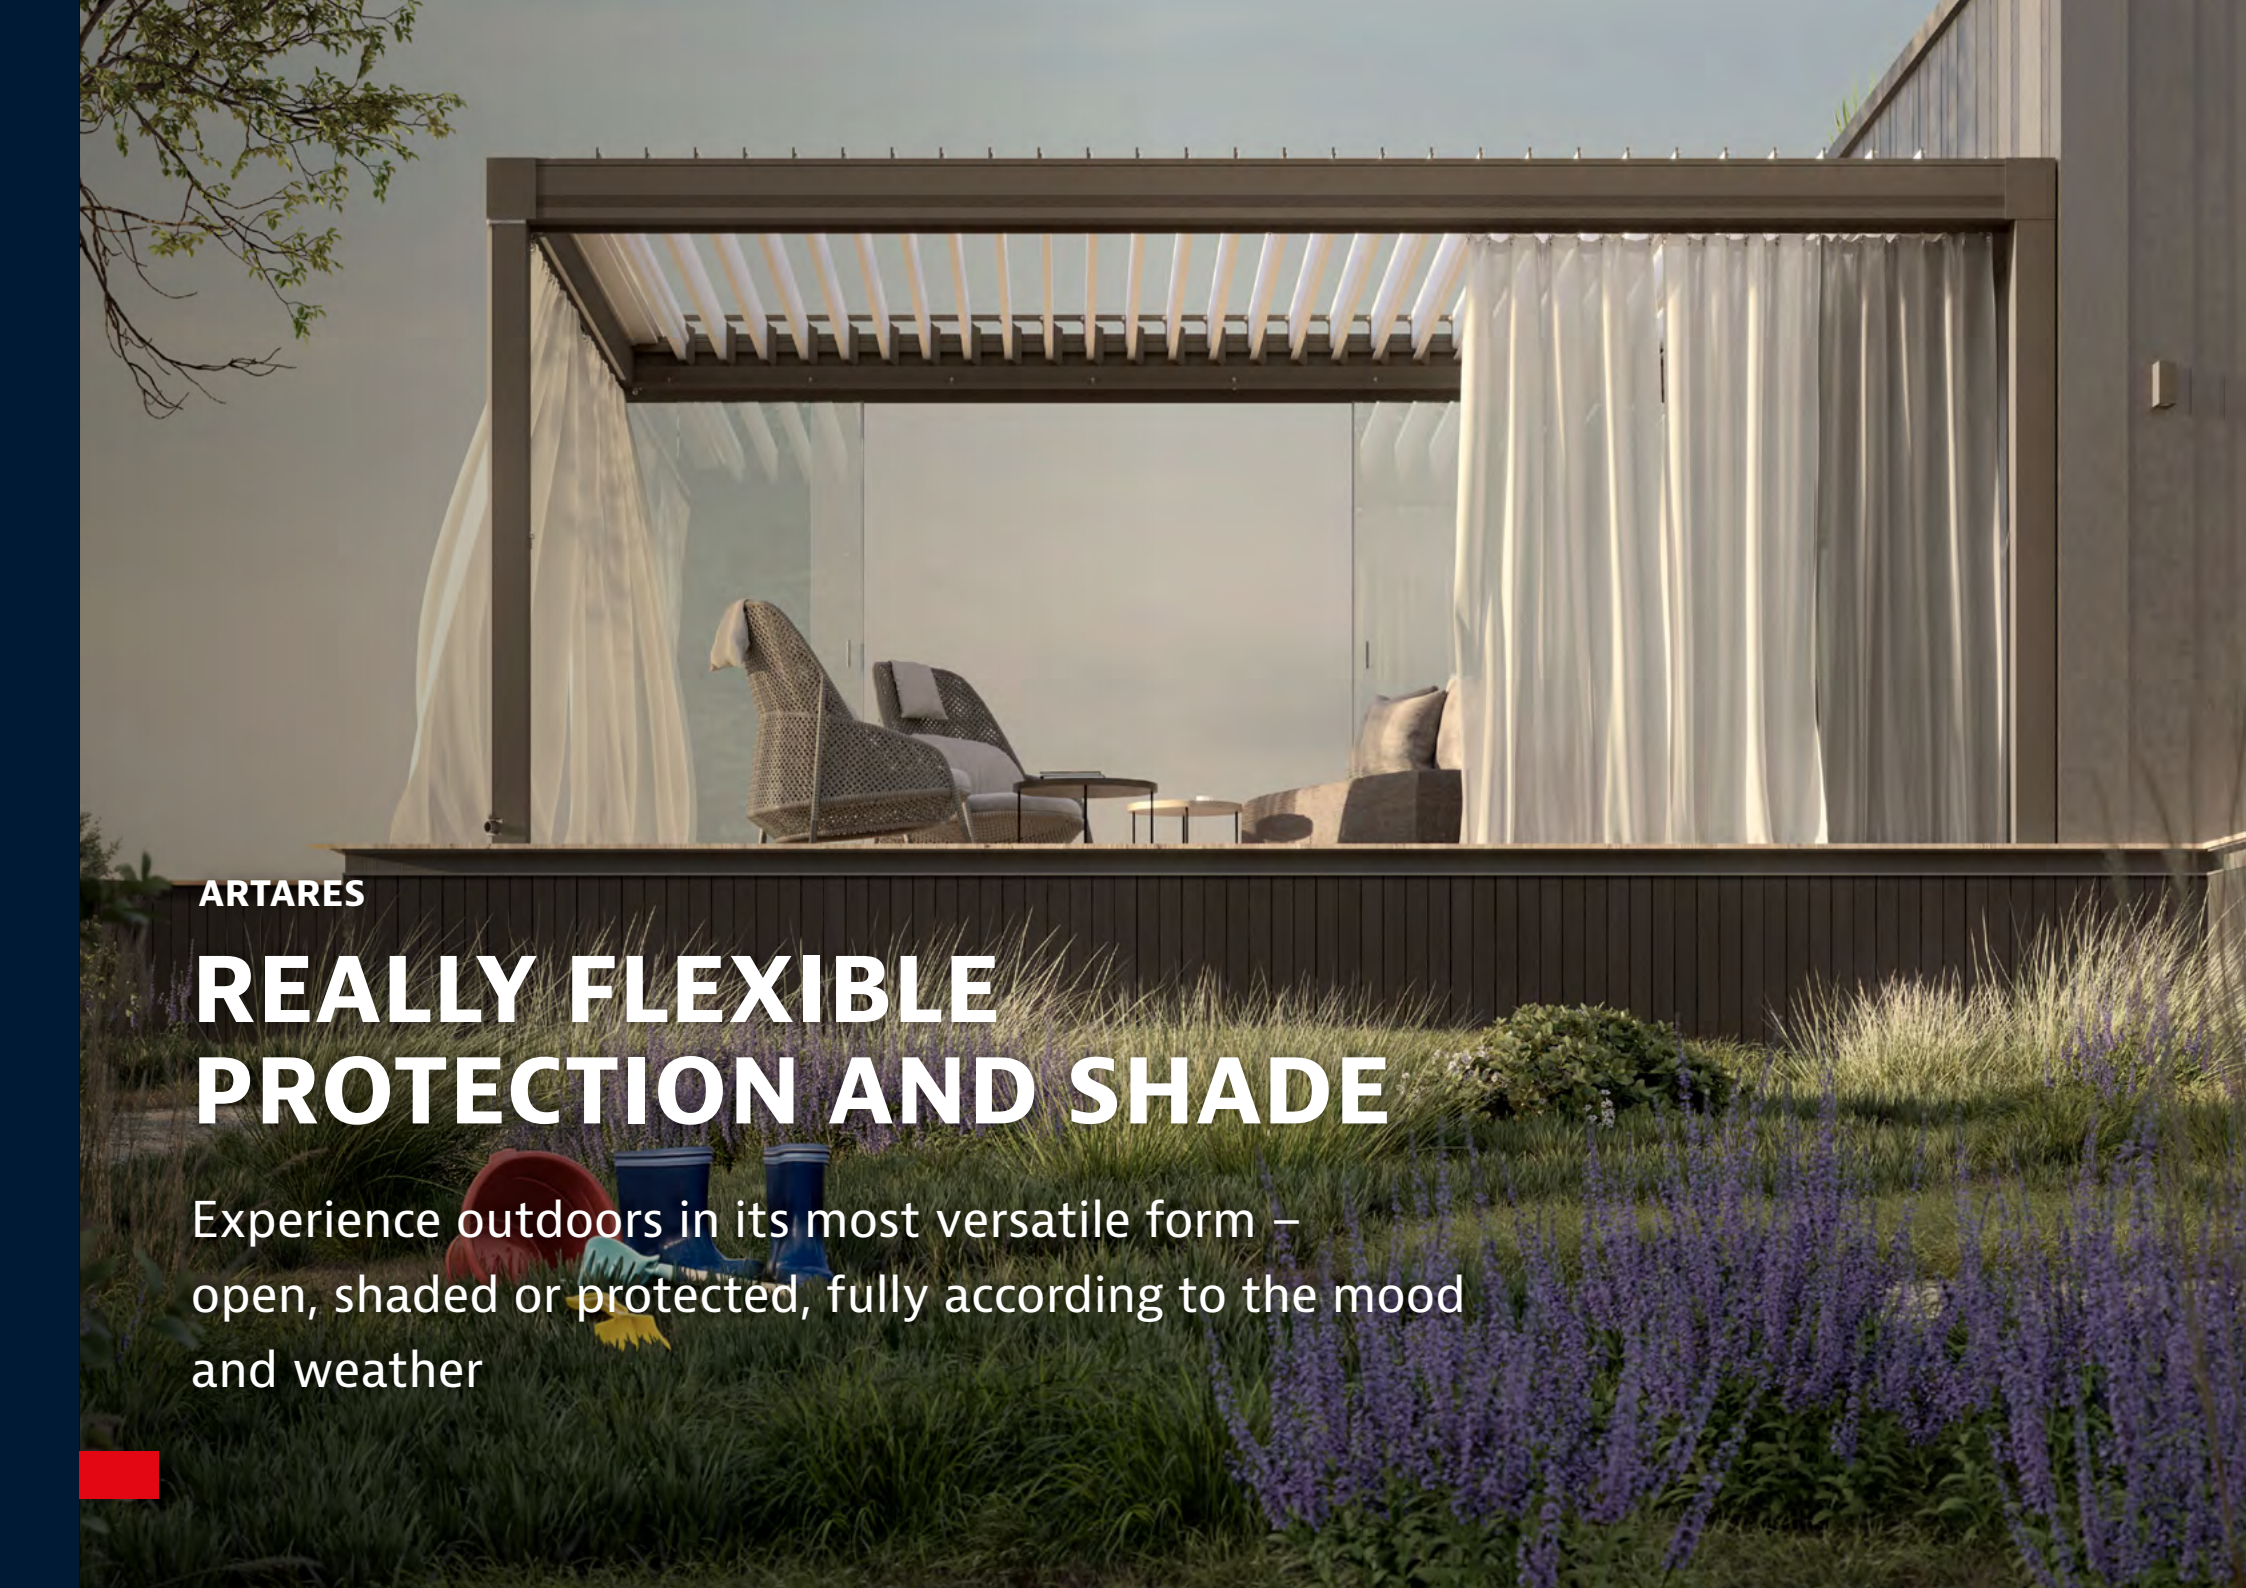

LOUVRED ROOF

A pergola with louvres adapts to your needs and mood: bathed in sunlight, pleasantly shaded, closed from all sides. You can control light, air and openness precisely and therefore use your patio with maximum flexibility from the beginning of spring until a long way into the autumn. For even better protection, the system can be extended to a Glasoase® with side elements – also retrofitted.

The clear construction and timeless aesthetic design blend naturally with your architecture. Weatherproof technology and intelligent control units ensure that the roof functions reliably and is easy to operate – for an outdoors which offers freedom and security at the same time and simply always feels right.

A modern outdoor patio area featuring a dark metal pergola structure. The pergola has a slatted roof and is partially covered by white curtains. Inside the pergola, there is a wicker chair, a wicker sofa, and a small table. The patio is surrounded by lush greenery, including tall grasses and purple flowers. The background shows a building with a dark facade.

ARTARES

REALLY FLEXIBLE PROTECTION AND SHADE

Experience outdoors in its most versatile form –
open, shaded or protected, fully according to the mood
and weather

A set of garden tools including a red bucket, a blue bucket, a pair of blue rubber boots, and a pair of yellow gloves, resting on the grass in the foreground.

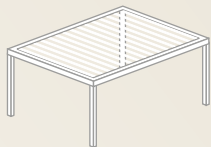

ARTARES

Equipment

- ✓ Low-noise louvres made in Germany
- ✓ Controlled drainage for closed louvres
- ✓ Integrated LED lighting in the louvres and the frame*
- ✓ Intelligent weather sensors possible*
- ✓ 5 anodised aluminium decorative strips for selection*

*optional

Louvred roof profile sketch

EXTENDABLE
as a weinor Glasoase®

Award-winning with:

reddot winner 2022

What is so special?

Adjustable louvres - with a motor
and intelligent weather control.

Artares combines clear architecture and movable function. Rotatable aluminium louvres can be adapted to the weather and your mood and enable an individual bioclimate under the roof. They control light, shade and air circulation precisely – from bathed in sunlight and open to pleasantly shaded or closed.

When the louvres are closed, rain is drained off in a controlled manner, whilst open louvres create expanse and natural ventilation. Thus, a space arises which changes during the course of the day and can be repeatedly adapted.

The Artares can be designed individually as your patio sky with extras such as integrated vertical sun protection or LED lighting on louvres and frames – and if required be extended with side elements to a Glasoase®.

TEXTILE PATIO ROOF

A textile patio roof combines the protection of a fixed roof with the lightness of an awning. It opens and closes as required – open for light and air, closed for protected moments.

Thus, a protected space is created which adapts to your wishes and renders your patio more independent of the weather and time of day.

WEINOR PERGOTEX II

OUTSIDE, WHENEVER YOU WANT – REGARDLESS OF THE WEATHER

Openness or protection at the touch of a button

WEINOR PERGOTEX II

Equipment

- ✓ Convertible Folding System
- ✓ With a rainproof PVC folding roof
- ✓ Stable aluminium fabric protection roof
- ✓ LED spotlights*

*optional

EXTENDABLE
as a weinor Glasoase®

Award-winning with:

reddot award 2016
best of the best

What is so special?

Weather-independent comfort,
flexibly extendable.

With weinor PergoTex II you decide the extent of openness or protection outdoors which just feels right. The textile folding roof can be opened or closed at the push of a button – for sun, fresh air or a reliably protected area under the roof.

The rainproof pergola awning allows you to use the patio regardless of the weather. The Pergona® collection for roof covering

is a specially developed, waterproof and robust fabric solution. Pergona® classic is almost opaque and ensures a calm, continuous light atmosphere, while Pergona® translucent allows significantly more daylight in and creates a brighter, more open feeling of space with the same protective effect.

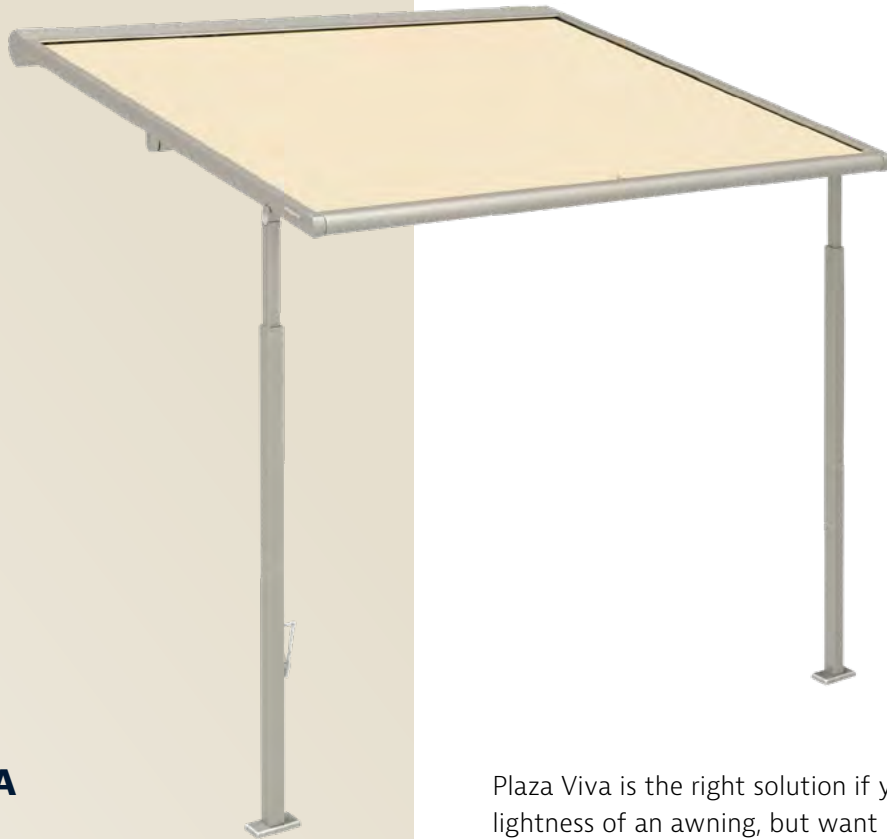

Complemented by frameless glass sliding doors, weinor PergoTex II becomes a Glasoase® – a wellness area full of light and lightness which can be opened flexibly. The frameless elements enclose the area transparently, protect against rain and draughts and create an atmosphere of protection and openness simultaneously.

PLAZA VIVA

INTELLIGENT PROTECTION FOR OUTDOORS IN ALL WEATHER CONDITIONS

Textile sun and weather protection with extra stability

PLAZA VIVA

Equipment

- ✓ Stable guide system with post and fabric tension for more wind and rain protection
- ✓ Telescopic post for controlled drainage*
- ✓ VarioShade valance with crank or solar drive*
- ✓ LED spotlights*

*optional

Plaza Viva is the right solution if you appreciate the lightness of an awning, but want more stability than a classic folding arm awning can offer. The side rail guide and front posts ensure that the fabric remains guided reliably and also appears smooth running and controlled on larger surfaces.

This creates a protected area which is particularly suitable for patios where classic folding arm awnings reach their limits. Plaza Viva combines openness at the front with additional guidance, thus ensuring greater operating safety in everyday use.

The telescopic post is a central feature: when it rains, the frame can be lowered in a targeted manner, enabling water to drain off in a controlled manner. This protects the fabric and allows further

What is so special?

The telescopic post can be lowered when it rains – the water drains off, the fabric is protected and you also can continue to enjoy your patio during light rain showers.

patio use even under changing conditions without having to react spontaneously or rearrange any items.

Plaza Viva can be expanded individually, for example with lighting, side sun protection or a heater. This creates a textile roofing which gives you more scope for everyday life – an airy appearance, stable guidance and is clearly designed for use.

Award-winning with:

DESIGN & ACCESSORIES

Accessories from weinor make your outdoors as individual as your life – with weather-independent comfort, harmonious design and technology which matches perfectly with your outdoor personal space.

A modern, frameless all-glass structure with sliding technology, situated outdoors near a pond and trees. The structure is made of clear glass panels held together by a thin metal frame. Inside, there is a blue sofa and a dining table. The structure is surrounded by lush greenery and a wooden deck. The scene is captured in the late afternoon, with warm sunlight creating a golden glow. The text 'W17 EASY' is positioned above the main title, and 'Open? Protected? Bathed in light' is at the bottom. A small red square is in the bottom left corner.

W17 EASY

FRAMELESS ALL-GLASS ELEMENTS WITH SMOOTH-RUNNING SLIDING TECHNOLOGY

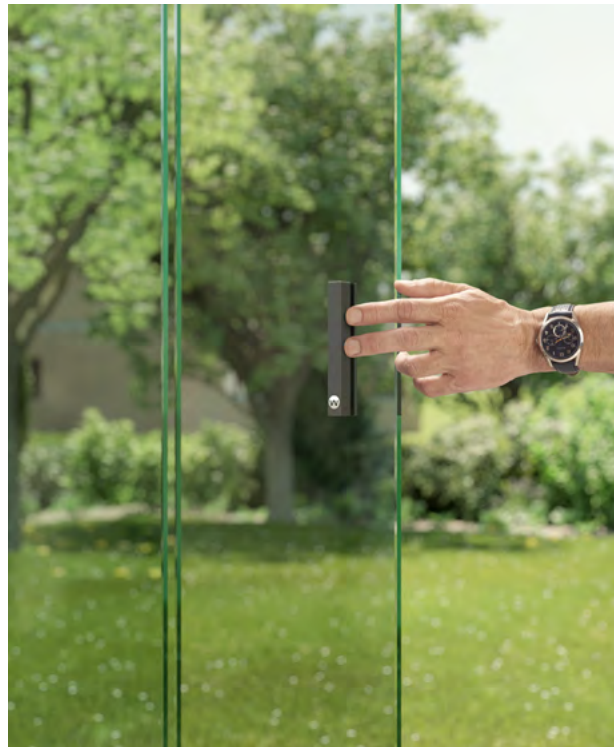

Open? Protected? Bathed in light

W17 EASY

Equipment

- ✓ Frameless all-glass elements
- ✓ Smooth-running sliding function
- ✓ Can be opened partially or completely
- ✓ Reliable protection against wind and rain
- ✓ Seamless integration with the patio roof
- ✓ System solution for the Glasoase®

■ Transforms your patio roof to a
■ **weinor Glasoase®**

What is so special?

- Frameless all-glass elements with
- smooth-running sliding technology.

w17 easy expands your patio roof with maximum transparency. Frameless all-glass elements can easily be slid to the side and open the space as required – completely or partially.

When closed, they provide reliable protection against wind and driving rain without restricting the outdoor view. This retains the character of your patio: open, bathed in light and flexibly usable.

WEINOR GLASOASE®: A SPACE CONSISTING OF GLASS AND LIGHT

The weinor glass patio roofs, the textile weinor PergoTex II patio roof as well as the Artares louvred roof can be extended as a Glasoase® with w17. Therefore, a transparent, shielded outdoor space is created on your patio, which simultaneously radiates freedom and security – open to the eye, flexible in its use and harmonious in its architecture.

SOTTEZZA

ATMOSPHERE UNDER GLASS

SOTTEZZA

Equipment

- ✓ Can be retrofitted under a variety of different roof structures
- ✓ Optimum complement for weinor patio roofs
- ✓ LED spotlights*
- ✓ Very high fabric tension due to the counterbalance system
- ✓ Also provides shading for large surfaces with multi-section units
- ✓ Lateral fabric guide with Zip OptiStretch*

*optional

Profile variants

Sottezza Originale for Terrazza Originale

Sottezza Pure for Terrazza Pure, Terrazza Pure MAX and Terrazza Semptra

What is so special?

Long-lasting solution under glass – reliable sun protection and a homely atmosphere in one.

Sottezza is an awning under glass for conservatories and glass roofs. It is mounted underneath the glazing and ensures that light and heat in the room can be controlled in a targeted manner – without losing the transparency of the roof.

The textile sun protection reduces direct sun radiation considerably. This contributes to a noticeably more pleasant room climate and protects against glare, for example when working, reading or relaxing in the conservatory.

Since the awning is located under the glass, it remains permanently clean and protected against external influences. When the cassette is retracted, it remains almost invisible – your architecture appears clear and open. In the evening, the optional integrated LED lighting transforms your patio into an atmospheric oasis, where the day draws to a gentle end.

Award-winning with:

WGM TOP

FLEXIBLE PROTECTION ON THE GLASS

WGM TOP

Equipment

- ✓ Can be retrofitted to a wide range of roof constructions
- ✓ Lateral fabric guide with Zip OptiStretch*
- ✓ A wide range of installation solutions
- ✓ Sun, wind and rain sensors*
- ✓ Also shades large areas with multi-section units

*optional

What is so special?

Can be installed on glass – ensures cool heads and a pleasant climate under all patio roofs.

WGM Top is an external conservatory awning which is installed above the glass roof. It takes effect where heat is generated: even before the sunlight reaches the glass.

Due to the external sun protection, the heating up of the conservatory is reduced significantly. This ensures a more pleasant room climate and makes the conservatory a place where you like to stay, even on sunny days.

Thanks to its stable construction, the fabric also remains reliably tensioned, even in the wind. This is ensured by the proven weinor Stretch and OptiStretch technologies: Stretch keeps the fabric permanently under even tension, ensuring a smooth, even appearance. OptiStretch further enhances this effect on larger constructions and supports lateral guidance – for an especially smooth fabric surface even in more demanding conditions.

With a wide range of colours and fabrics, WGM Top can be designed to fit your home while bringing comfort and lightness outdoors.

VERTITEX II

COMPACT VISION AND SUN PROTECTION FOR SEVERAL INSTALLATION SITUATIONS

Subtle design, versatile use

VERTITEX II

Equipment

- ✓ weinor Opti-Flow-System® supports the whole roller tube
- ✓ Safely guided – even in the wind
- ✓ Can be retrofitted to patio roofs, conservatories, pergola systems and windows in a variety of ways

Profile variants

Square

Round

ZIP guide

Rail guide

Rope guide

What is so special?

- Small cassettes for up to 6 m width.

Award-winning with:

VertiTex II is the most versatile vertical awning from weinor – slim in design, strong in function. With its particularly compact cassette, it is ideal for windows, patio sides or Glasoasen®, where subtle integration is important.

It protects against sun, glare and prying eyes reliably – exactly where classic awnings reach their limits. Three guiding systems can be chosen: Rope, rail or the extra-stable ZIP guide, which also keeps the fabric safe in wind.

The **screens by weinor® collection** is available for even more creative freedom. The specially developed fabrics range from transparent screens which maintain views and daylight to opaque versions for maximum privacy and shade. Your VertiTex II thus becomes perfectly fitting visual and sun protection – technically as well as visually.

VertiTex II also adapts visually to your style: With over 200 frame colours and high-quality patterns – from subtle to striking.

PARAVENTO

PERFECTLY COMPLEMENTED AT THE SIDE – FOR MORE PROTECTION AND PRIVACY

The practical side awning for your outdoors

PARAVENTO

Equipment

- ✓ Ideal for retrofitting
- ✓ For even more protection against the sun, wind and prying eyes
- ✓ With an oblique cut for angled awning front edges*
- ✓ Colour harmony through accurate coordination with your existing construction

*optional

What is so special?

- Subtly hidden in the cassette,
- quickly extended to the side.

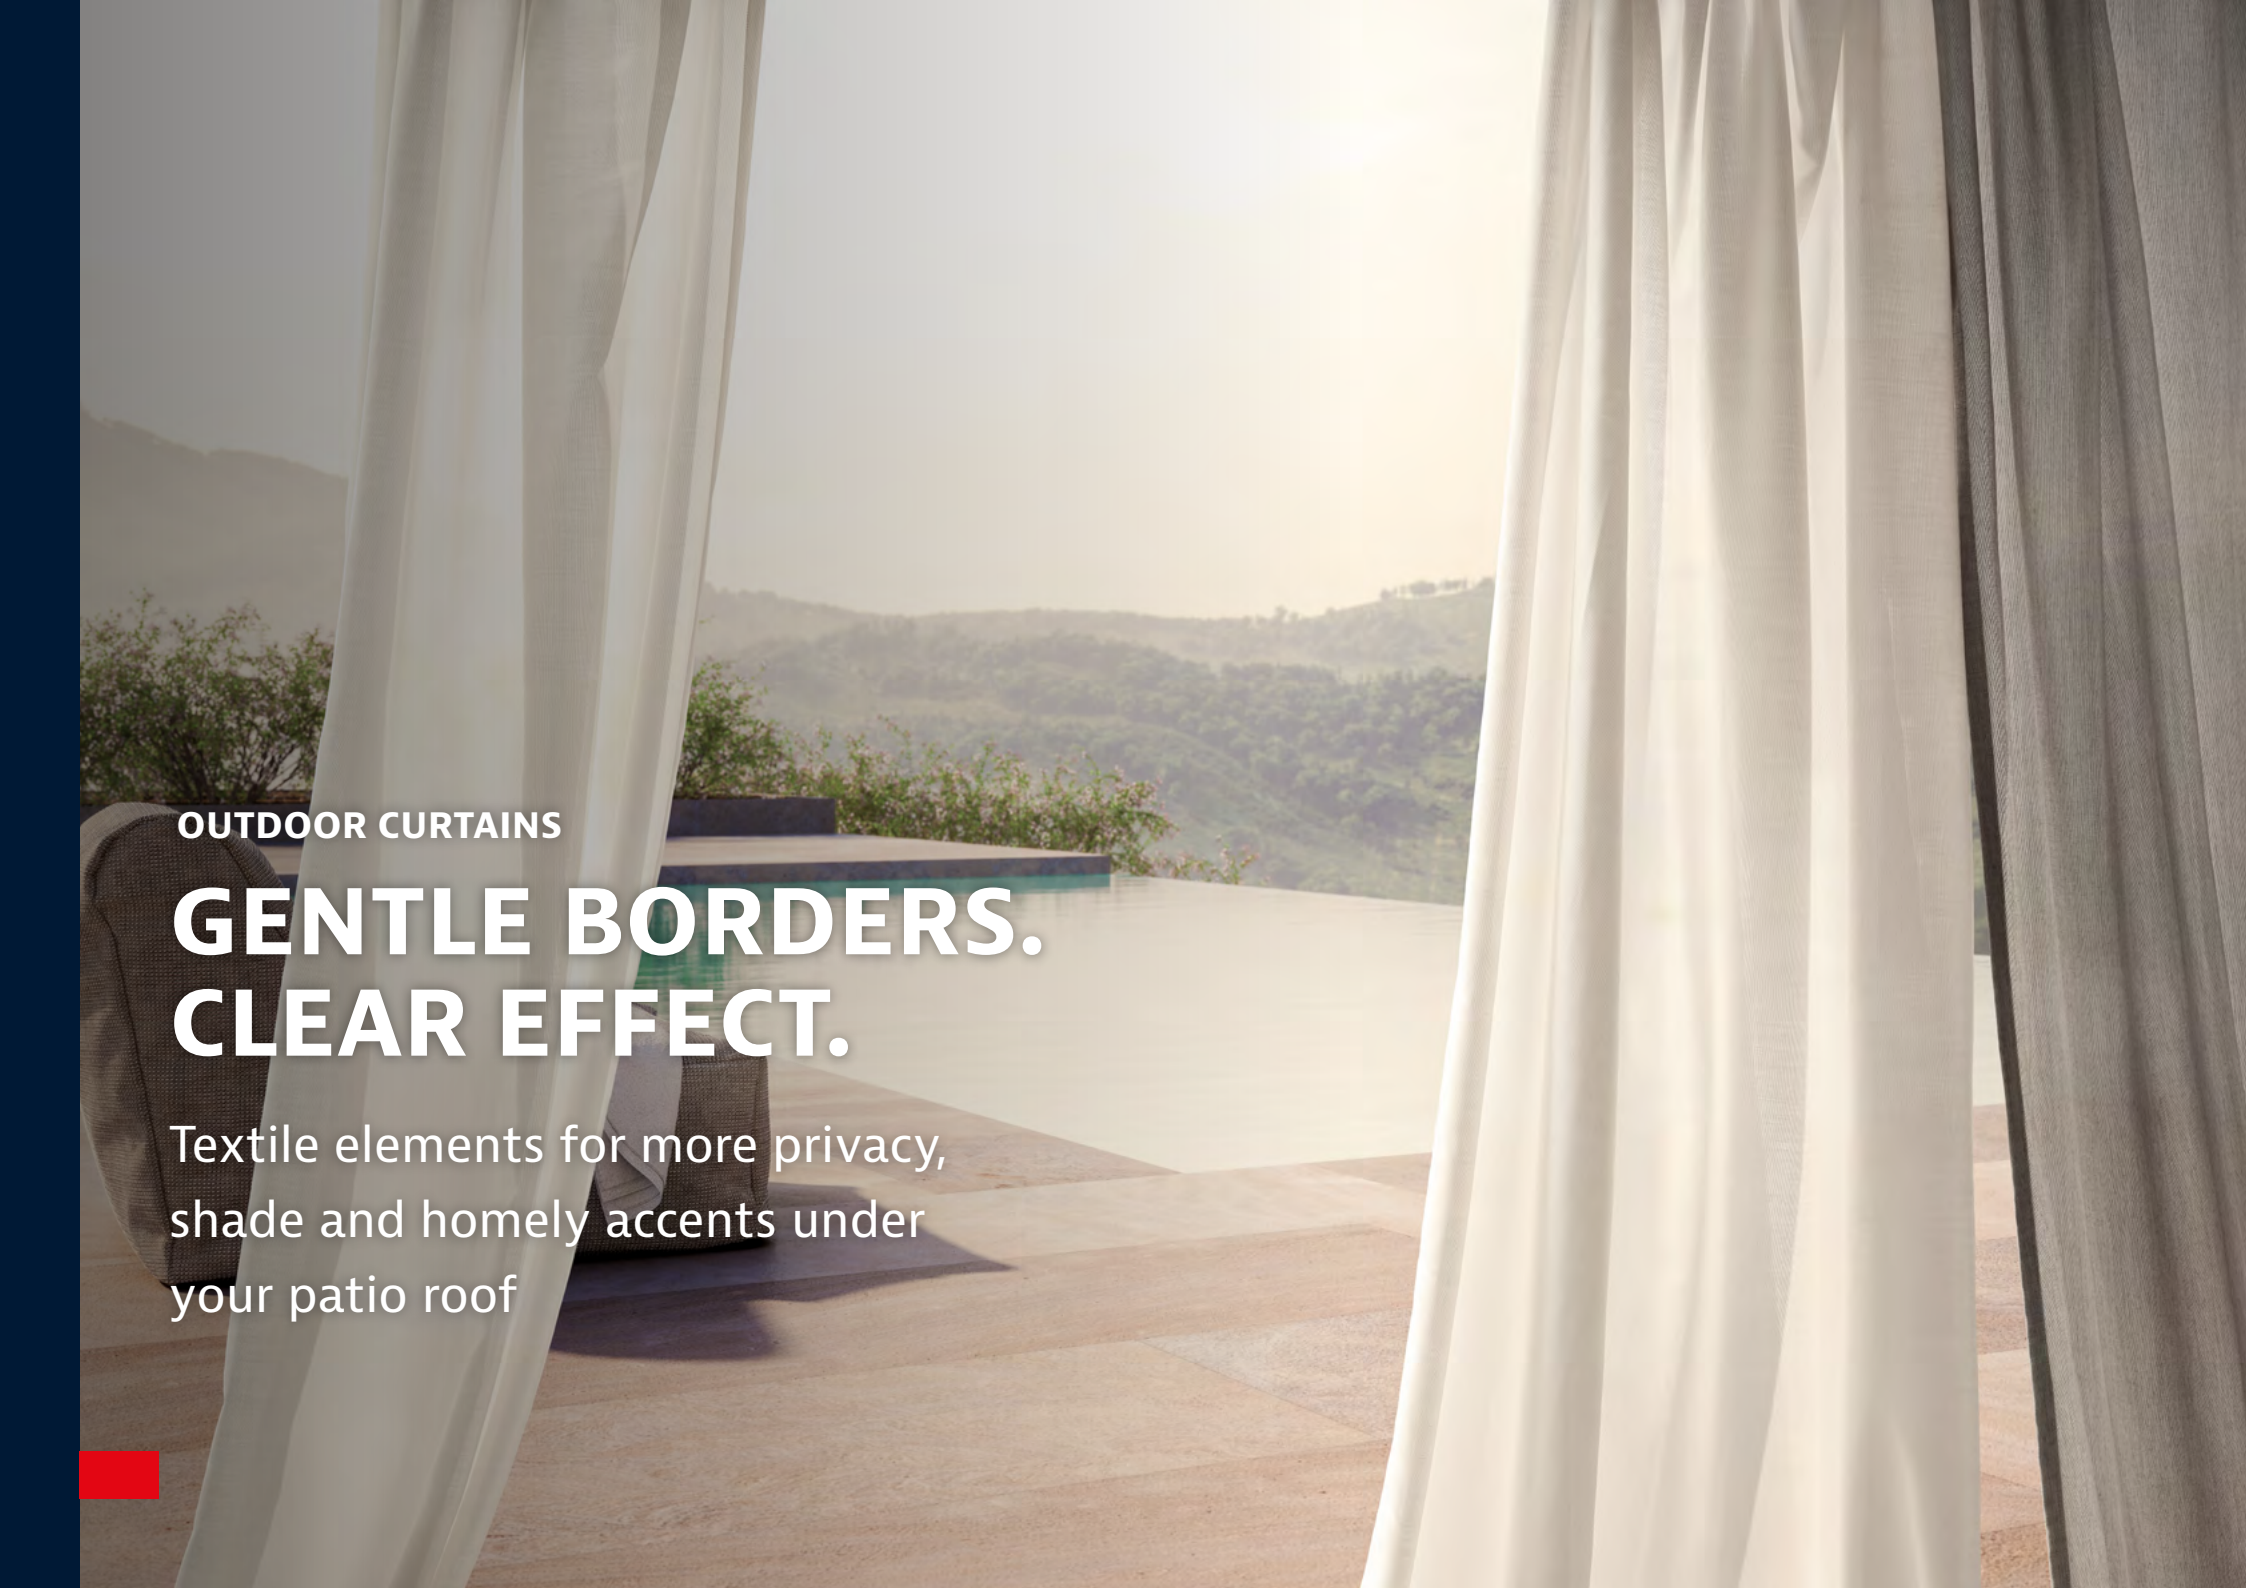

Paravento makes your patio really complete. The side awning reliably protects against prying eyes, low sun and light wind – for relaxed hours without any side interference.

The compact housing blends harmoniously with the design of your folding arm awning or patio roof and can be colour-matched accurately to the existing frame. Available with all my collection fabrics, your Paravento matches your awning or sets a design accent consciously.

With a few simple steps, Paravento is pulled out manually and fixed to the post on the wall. For even more flexibility, it is also available with an oblique cut – ideal for angled awning front edges.

If not currently needed, the fabric disappears elegantly into the cassette – invisibly and is safely stored until next used.

This creates a protected retreat on your patio – stylishly integrated, quickly rolled up and rolled in.

A photograph of an outdoor patio area. In the foreground, two white, sheer curtains hang from the top, framing the view. The patio floor is made of light-colored stone tiles. In the background, there is a large, rectangular infinity pool that blends into the landscape. Beyond the pool, there are rolling green hills and a clear sky. A dark, textured outdoor chair is partially visible on the left side of the frame.

OUTDOOR CURTAINS

GENTLE BORDERS. CLEAR EFFECT.

Textile elements for more privacy,
shade and homely accents under
your patio roof

OUTDOOR CURTAINS

Equipment

- ✓ Weatherproof outdoor fabrics
- ✓ Supplementary to patios and louvred roofs
- ✓ Guide rail consisting of high-quality, powder-coated aluminium
- ✓ Stable rollers for smooth-running opening and closing

What is so special?

Six noble colour versions for selection from the Summer Dream collection.

Outdoor curtains lend your patio a new dimension. They create protected areas without closing the space and ensure pleasant shadowing in low-lying sun.

The light textile moves in the wind, filters glances and provides the exterior with a homely atmosphere. Therefore zones for retreat and relaxation arise combined with glass elements, which are flexible and can be changed at all times. Several panels can be positioned individually, thus providing you the opportunity to repeatedly create new spatial effects.

LIGHTING

YOUR OUTDOORS. YOUR LIGHTING MOOD.

Subtle, accentuating or orchestrated in colour – effective lighting lends your evenings a very special atmosphere

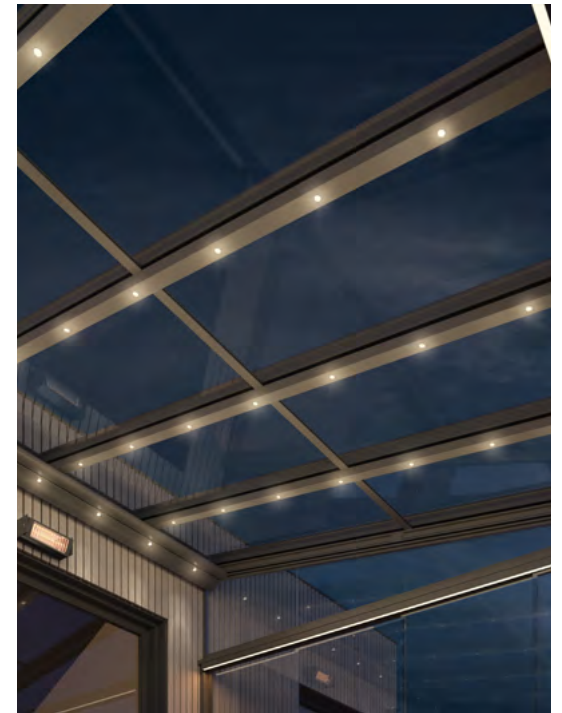

What is so special?

Warm white or coloured lighting – harmoniously integrated into the construction.

Integrated LED spotlights and light bars also put your patio atmospherically into the limelight after sunset. Depending upon what is desired, a warm white, even base light or colourful orchestration with individually selectable nuances arises.

The lighting is harmoniously integrated into the roof supports, louvres or the frame and emphasises the architecture without forcing its way to the fore. Supplementary accent lighting can accentuate individual areas in a targeted manner, creating additional depth.

You determine the atmosphere which arises – subtly distanced or deliberately orchestrated.

TEMPURA HEATING SYSTEM

PLEASANT HEAT AT THE TOUCH OF A BUTTON

Pleasant radiant heat extends your patio season

If the temperatures drop, the Tempura heating system provides pleasant radiant heat under your patio roof. The infrared technology warms persons and surfaces in a targeted manner – without needing a long warming-up time and without unnecessarily circulating the air.

Thus, your patio also remains a place where you can dwell on cooler evenings. Subtly integrated and easy to control, the heating system is integrated harmoniously into the construction.

What is so special?

Efficient infrared radiation heat
with a fast effect.

What is so special?

They react automatically when
the weather changes

WEATHER SENSORS

INTELLIGENT COMFORT

Sensors react automatically to sun, wind and precipitation and adapt the system independently.

Wetter sensors increase comfort and security under your patio roof. When the sun shines intensely, there is a fresh breeze or it rains, they react automatically and move awnings and louvres to a protective position.

Therefore, your outdoors is then also protected when you are not there. The sensors are integrated unobtrusively and can be integrated seamlessly into existing control systems.

What is so special?

Complete load distribution via the created supporting profile for greater stability and an open space effect.

SUPPORTING WALL CONNECTION FRAME

SAFELY ANCHORED

Resilient connection with the building.

A supporting wall connection on the home wall assumes the complete load distribution of your patio roof. The forces are guided via the support profile in a targeted manner without statically burdening the exterior wall.

The construction replaces direct load transfer into the home wall and is an independent, load-bearing solution. Constructional connection is made cleanly and blends technically and visually harmoniously with the existing architecture-

WHICH CONTROL UNIT MATCHES YOUR OUTDOOR FEELING?

Comfort starts with control: At weinor, you can choose how to operate the awning, light, heating and privacy protection – simply by crank, conveniently by remote control or very smartly by app. Everything is possible. And everything matches.

Manually [★] – classic with a crank

Ideal when no power connection is available or when you deliberately wish to refrain from the use of technology. The awning can be manually operated easily – electricity-free, independently and can be used in almost any construction situation.

Comfort ^{★★★} – everything under control

With a remote system, you can operate your awning comfortably – in addition, you can choose lighting (also dimmable) and heating if desired. Everything can be easily controlled at the touch of a button – for atmospheric moments as you like them.

Base ^{★★} – convenient with remote or automatic control

Control your awning easily with a hand transmitter or switch – with optional automatic weather control which reacts independently in the sun, wind or rain. Practical, reliable and without much technical effort.

Smart ^{★★★★} – networked and foresighted

By app, time control or voice command: Your outdoor equipment is intelligent. Thanks to the Smart Home connection, you enjoy maximum comfort – fully automatically, exactly according to your rhythm of life.

ARCHITECTURE & ATMOSPHERE

Every home has its own character – and a patio roof should pick it up and not conceal it. Find the patio roof from weinor which fits your home:

Colours, shapes and materials can be tailored to the facade, windows and the style of your house and your taste in a targeted manner – from restrained and harmonious to deliberately accentuated. Therefore, your patio roof becomes an architectonic extension which combines protection and atmosphere.

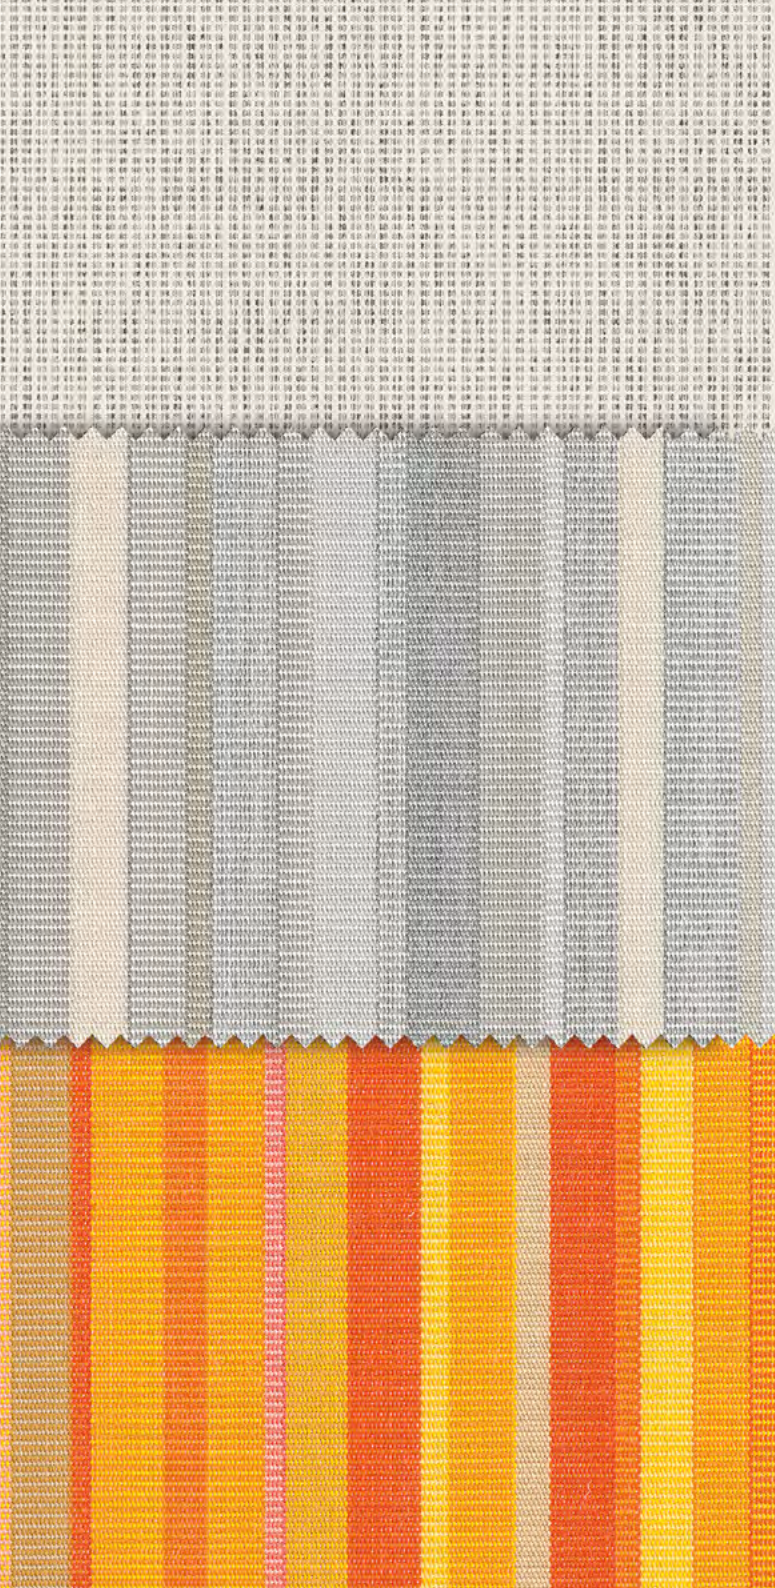

AWNING FABRICS

COLOUR, PROTECTION AND ATMOSPHERE

Awning fabrics characterise the atmosphere under your patio roof. They filter the light, reduce glare and influence the colour effect of the entire exterior. Fabric-dependent, a bright, open mood or a protected, pleasantly shaded zone results.

As well as the design effect, the high-quality materials convince with their good light fastness, durability and reliable UV protection. They are equipped water-repellent, easy-care and durable – for long-lasting sun protection under and above glass.

What is so special?

Colours which remain radiant for a long time - because the fibres are always completely imbued (like a carrot) and not superficially.

my collections 2

Large selection of awning fabrics for awnings under glass and on glass – for solutions which match the architecture, atmosphere and your personal style.

Pergona®

Special waterproof fabrics for the textile patio roof (weinor PergoTex II). Optionally almost opaque or translucent for more light transmission.

screens by weinor®

Technical screen-woven fabric for vertical sun protection. Reduce heat and glare whilst simultaneously providing an outdoor view.

EXPERIENCE YOUR FAVOURITE FABRICS LIVE

Order your favourites directly to your home. Original samples show how colour, structure and light effect work in your personal environment.

Find your individual fabric under:
www.weinor.com/awning-fabrics

FRAME COLOURS

INDIVIDUAL AND HARMONIOUS

With more than 200 frame colours, weinor offers you almost unlimited design possibilities. Whether tone-on-tone with the facade and fabric or deliberately rich in contrast – you determine what suits you.

All colours are applied in a high-quality powder coating process at our own factory in Germany and are particularly durable, UV-resistant and easy to maintain. This way your stylish exterior area will remain permanently beautiful.

47 standard RAL colours

Uniform colour – guaranteed

Careful processing ensures that colours and gloss levels match accurately with all your products – even with subsequent additions or retrofits.

9 conservatory trend colours

Choose from an abundance of high-quality colours:

- 47 standard RAL frame colours, satin finish
- 9 scratchproof, resistant conservatory trend colours with an elegant textured look
- More than 150 special RAL colours

Colour manufacturers make every effort to guarantee colour shade stability. Despite this, as a result of the ban on the addition of heavy metals, it therefore cannot be fully ruled out that in particular the colour flame red (RAL 3000) may fade during the course of time.

Further information about our world of colour is available here:
www.weinor.com/architecture-mood

What is so special?

Sealed all around. Permanently protected. Thanks to premium powder coating from weinor – without open cutting edges, without corrosion.

Important details: All the illustrated equipment items are weatherproof outdoor furniture and accessories.

Fabric qualities: weinor awning fabrics meet strict quality requirements and are produced using state-of-the-art production technology. Despite this, blemishes like creases, rippling in the seam and hem area, overstretching in the hem area and honeycombing cannot be ruled out. This has no negative impact on the quality and operating life and are not a reason for rejection. Further information: www.weinor.com/awning-knowledge

Awnings and conservatory awnings: must be retracted when it is raining or windy – risk of pooling! Fabrics which have become wet may have more wrinkling, honeycombing, water stains and mildew. They should therefore be extended again to dry when the weather is better.

Frame colours: depending on the frame colour ordered, we deliver all small parts, as well as gear handles and gear boxes in black (similar to RAL 9005), white (similar to RAL 9016), or in grey (similar to weinor 7319).
